## 8. Statement of Significance

### Applicable National Register Criteria

☐ **A** Property is associated with events that have made a significant contribution to the broad patterns of our history

☐ **B** Property is associated with the lives of persons significant in our past.

☒ **C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ **D** Property has yielded, or is likely to yield, information important in prehistory or history.

### Criteria Considerations

Property is:

☐ **A** owned by a religious institution or used for religious purposes.

☐ **B** removed from its original location.

☐ **C** a birthplace or grave.

☐ **D** a cemetery.

☐ **E** a reconstructed building, object, or structure.

☐ **F** a commemorative property.

☐ **G** less than 50 years of age or achieved significance within the past 50 years.

**The Barclay Building  
Jackson County, Missouri**

---

**Summary**

The Barclay Building, located at 3613-3623 Broadway Boulevard, Kansas City, Jackson County, Missouri, is a two-story, terra cotta clad Beaux-Arts styled building designed by the prominent Kansas City architect, Robert F. Gornall in 1924. The contractor of this Two-part Commercial Block building was Edelman-Fleming Construction Company. Unique in its design, the Barclay displays storefront windows at the first story, with large display windows on the second story. The building possesses a full entablature that is composed of a molded architrave with dentils, a wide frieze that has decorative panels along the north and south corners and a projecting cornice. A green clay tile roof that shelters the parapet wall crowns the entire composition. Located on a major thoroughfare in Mid-Town Kansas City, Missouri, the Barclay is sited in a commercial area. The Ambassador Hotel Historic District, listed on the Kansas City Register of Historic Places, is located to the north and west of the property. Other buildings designed by Gornall are located directly to the north of the Barclay and were constructed during the same time period. In good condition, the Barclay Building has retained the majority of its historic features to convey its historic significance. Its integrity of location, design, setting, materials, workmanship, feeling and association has been retained.

**Elaboration**

The Barclay Building is two stories in height, five bays wide and measures approximately 65' x 80'. The main or west façade is clad in terra cotta; the remaining facades are faced in brick. Gornall's design called for a two-part commercial block building with Beaux Arts and Classical design motifs throughout the main façade. The storefront, partially modified from the original with aluminum-framed plate glass windows, rests on a mahogany granite base with terra cotta piers that rise to define the vertical divisions. A belt course with wave moldings separates the first story from the second floor. The five bay pattern of the first story is enhanced in the second story by receding wall planes and projecting bay windows. A Palladian window with an oval medallion with swag and garland motif marks the central bay. The other four, second story windows are set within recessed wall plane arches and project as a three-sided bay. Copper roofs and window enframements are characteristic

**The Barclay Building  
Jackson County, Missouri**

---

throughout. Ornate keystones and corner rosettes relieve the wall surfaces. The building possesses a full entablature that is composed of a molded architrave with dentils, a wide frieze that has decorative panels along the north and south corners and a projecting cornice. At the first floor, the piers terminate in massive consoles that support the copper cornice. A non-original, aluminum sash and canopy have been installed on the first story, south bay.

The Barclay Building still displays its unique interior floor plan that was designed to accommodate second floor shops, rather than offices. The second floor was planned with large display windows to provide equal prominence with the first story level. The building is set back from the property line to permit the second floor windows to protrude from the façade. Robert Gornall's office, located at the southeast corner of the second floor, still retains the terra cotta embellishment at the office door, while his name is carved above the office entrance.

**Future Plans**

Currently the property is undergoing rehabilitation for adaptive re-use. Plans for the project are in accordance with the *Secretary of the Interior's Standards for the Treatment of Historic Properties* and have been submitted to the Missouri State Historic Preservation Office and the National Park Service for review and compliance.

Section number 8 Page 7

**The Barclay Building  
Jackson County, Missouri**

---

### Summary

The Barclay Building, 3613-3623 Broadway Boulevard, Kansas City, Jackson County, Missouri, is locally significant and eligible for listing in the National Register of Historic Places under Criterion C in the following area: ARCHITECTURE. Designed in the Beaux Arts style by the prominent Kansas City architect, Robert F. Gornall, the Barclay Building is representative of the work of Gornall as one of his unique architectural designs. Large, second-story display windows characterize the two-part commercial building, designed with a wide second story corridor. Furthermore, the Barclay Building marked a transition from the large urban retail department storefronts of the downtown central business district to a smaller suburban retail storefront. In addition, the Barclay, as with the Garrett and Betsy Ross buildings of the same block, was a departure from the independent suburban vendor operating their business on the first floor while residing on the second floor over their shops. By centering the retail district to a single corridor, developers were able to open the land of the surrounding blocks to new residential opportunities. The Barclay Building's integrity of location, design, setting, materials, workmanship feeling and association has been retained. The period of significance of the Barclay is 1924, the date of its construction.

### Elaboration

The Barclay Building was one of the growing number of buildings in residential areas for commercial use that were being constructed to replace the independent resident/merchants that were so common in the Valentine, Broadway, Hyde Park and Main Street area. Robert Gornall's design for the Barclay was unusual in that it gave prominence to the second-floor shop windows that served as display windows which could be easily viewed by cars driving on Broadway, as well as by pedestrian traffic passing from across the street or near the curb beneath the windows. The design of the Barclay Building was an adaptation of a design used in modern commercial buildings being constructed in France at the time.<sup>1</sup>

**The Barclay Building  
Jackson County, Missouri**

Robert Gornall designed a substantial number of commercial buildings along the Broadway corridor between Thirty-Fourth and Thirty-Ninth streets, as well as residential apartment-hotels. Many of the buildings were constructed during a commercial and residential building boom that occurred between 1923 and 1930. This may explain the reason why Gornall relocated his office to the Broadway area. His original drawings of the Barclay floor plan included space for his own office that was located to the rear of the second floor.<sup>2</sup>

The Barclay Building at 3613-3623 Broadway was the third building in the 3600 block of Broadway designed by Gornall. The other two buildings, built prior to the Barclay, were the Garrett Building at 3601 Broadway and the Betsy Ross Building at 3611 Broadway. In 1925, another Gornall design, the Hyde Park Hotel was constructed on the northeast corner of Thirty-Sixth Street and Broadway followed by the Congress Building in 1926.<sup>3</sup> As the residential areas of Kansas City expanded south along Broadway during the 1920s, there was a strong demand for specialty shops instead of the usual second floor office space. Those individuals and families moving into the neighborhoods surrounding this section of Broadway desired easy access to goods, such as specialty clothing shops, grocers and household supplies. Services that were necessary came from cleaners, tailors, beauticians, barber shops and a theater. The owners and their architect, Robert Gornall, located at 203 Bruening Building, took this into consideration in designing the new building.<sup>4</sup>

Prior to 1900 the area south of 3600 Broadway was dotted with estates of the very wealthy businessmen and other prominent families of Kansas City society. As the population of Kansas City increased, families in the upper middle class began moving south as well. In 1905 a major apartment complex was built on Armour Road between Broadway and Central. The Colonnade Apartments were located at 201-219 W. Armour Boulevard.

Continuation Sheet**

Section number 8 Page 9

**The Barclay Building  
Jackson County, Missouri**

Kansas City real estate pioneer, William H. Collins, constructed the complex.<sup>5</sup> By 1909, a boom in apartment house construction began in Kansas City. James A. Rose, a prominent Kansas City builder, completed one of the more luxurious apartment complexes constructed for the upper middle class in 1910. Knickerbocker Place, situated between Broadway and Pennsylvania Avenue at 36<sup>th</sup> Street, was only two blocks long but contained 56 apartments in total. Rose built the Knickerbocker at a cost of \$250,000. The area was far from the noise of the central business district, yet, close enough for convenient commuting. Two streetcar lines were less than a block away for a fifteen-minute trolley ride or ten-minute automobile ride to the heart of the downtown business district.<sup>6</sup> In 1910, horse-drawn taxis were still serving the area.<sup>7</sup>

As automobile traffic increased in Kansas City and roads were improved the migration beyond the city limits took precedence for land developers. Numerous apartment complexes were constructed between Thirty-First Street on the north and Thirty-Ninth Street to the south and between Gillham and Valentine Road or from east to west. During the first two decades of the Twentieth century, the residents of the area relied heavily on local merchants to supply their needs. Interspersed between apartments, duplexes and single-family dwellings; individual vendors operated their businesses from the first floor of their homes while living on the second floor. In 1909, in the 3600 block between Broadway and Central Avenue, nine dwellings out of seventeen were occupied by a vendor on the first floor as illustrated by a section of the Sanborn Insurance Map.<sup>8</sup>

### 3600 Block between Central and Broadway

Source: *Sanborn Insurance Map: Kansas City Missouri, 1909*

In 1923 Kansas City Life Insurance Corporation moved to the 3400 block of Broadway Boulevard bringing new jobs to the area as well. The South Broadway Realty Company was one of the developers that realized the need for a centralized shopping district offering a mixture of services and goods, as well as fine dining facilities. By 1924 the Barclay building was under construction as designed by Robert Gornall. The Barclay was the third

Gornall design to be constructed in the 3600 block of Broadway Boulevard.

In November 1924 a steam shovel was at work excavating the lot at 3613-3623 Broadway for the construction of a 65' x by 80', two-story building with basement.<sup>9</sup> The South Broadway Realty Company whose principals included E. J. Willett, Douglas S. Cramer and H. W. Pinnick owned the lot.<sup>10</sup> By the time excavation work had begun, the contract for the terra cotta work had been awarded to Western Terra Cotta Company, Kansas City, Kansas, and the steel work was awarded to Comer-Cockrell Metal Lath Construction Company, 1014 Baltimore, Kansas City, Missouri.

In March 1925 a second building permit was obtained for a one-story 40 x 50 foot brick addition with a flat composition roof to the rear of the Barclay. The Edelman-Fleming Construction Company was listed as the contractor with Fleming listed as architect. Although the use was not mentioned, the space most likely served as a loading area for Barclay and Barclay Furniture and other tenants.<sup>11</sup>

The Barclay Building was named for its major tenant, Barclay and Barclay Furniture. The company was a furniture upholstery firm that also dealt in antiques and home furnishings. The Barclay brothers, John W. and Wilbur J. Barclay, had maintained an upholstery and furniture repair shop in the 3400 block of Main for a number of years. By 1924 the brothers had expanded their business to include antique furniture. The brothers entered a ten-year lease with the South Broadway Realty Company.<sup>12</sup> The Barclay name remains intact just above the center, second story window.

Section number 8 Page 12

**The Barclay Building**  
**Jackson County, Missouri**

**Gornall's Trio (left to right): The Garrett Building, the Betsy Ross Building and the Barclay Building**

Robert Gornall, a prominent Kansas City architect, designed several significant buildings in the Kansas City area during the 1920s. A wide range of styles influenced his architectural designs. He was proficient in the Spanish Revival mode that is evident in the Tacoma Building, also known as the Netherlands Hotel, at 3835 Main Street. The Uptown Building and Theatre, 3700 Broadway, Kansas City, is one of his more lavish designs where the theater/office building displays an Italian Renaissance Revival theme.<sup>13</sup> Both the Tacoma Building and the Uptown Theater were listed in the National Register of Historical Places in 1979. The Congress Building, also

<sup>13</sup> With the Uptown, Gornall was in association with John Eberson, New York.

Continuation Sheet**

Section number 8 Page 13

**The Barclay Building  
Jackson County, Missouri**

known as the City Bank Building, built in 1925, is designed in the Beaux-Arts style and was listed on the National Register in 1983. Some of the decorative elements of this five-story reinforced concrete building can be seen in the exterior of the Uptown Theater, built one year later.

Three other Gornall designs within the Ambassador Hotel District were listed on the Kansas City Register of Historic Places in 1982, including the Georgian Revival styled Hyde Park Hotel (1924-1925), The Garrett Building (1924), designed in the Tudor Revival, and Betsy Ross Building (1923-1924), a Colonial Revival building inspired by the Betsy Ross House in Philadelphia.<sup>14</sup> One of his most outstanding single-family residential designs is the Michael Katz House, a Tudor/Norman Revival styled residence built in 1928 and listed in the National Register in 2004.

Although it is apparent that Gornall was proficient in interpreting a wide range of building types and styles, from the Italian Renaissance Revival to the Colonial Revival, in his commercial as well as his residential commissions, the Barclay stands out as one of his most unusual designs and illustrates innovative design elements in the storefronts of the first and second stories. Unlike the majority of Kansas City's commercial properties, the Barclay was given prominent semi-hexagonal display windows at the second story level. Instead of windows that were designed flush with the exterior wall plane, these windows allowed for viewing of merchandise from all angles. Furthermore, the second story was designed with a wide corridor for the ease of moving displays and furniture.

As Richard Longstreth points out in his book, *The Buildings of Main Street*, some of the early twentieth century examples of the Two-Part Commercial Block buildings are sometimes, "idealized versions of the traditional shop-house found in European communities." During the 1920s, "terra cotta, which could be cast into any form

<sup>14</sup>

and fired in almost any color, was considered an elegant substitute veneer and became widely used.”<sup>15</sup> With the Barclay, it is the treatment of the second story windows that are given distinction that mark this property apart from other Kansas City buildings of the era that display large plate glass windows at the first story, with less decorative and modestly configured windows at the upper stories. The Barclay is further enlivened by the use of terra cotta at the primary façade, giving additional texture and contrast to the adjacent Gornall designed properties to the north.

Robert Gornall first appeared in the city directory in 1914 when Sanneman and Gould employed him as a draftsman. At that time, he resided at 1516 Myrtle Street with his wife Harriet. From c.1917 -1919, Gornall was employed as a draftsman at the Heidenreich Engineering Company. Located at 722 Dwight Building, Kansas City, Missouri, the firm designed concrete ships and grain elevators. By 1919, he was in partnership with the prominent Kansas City architect, Samuel Tarbet. The partnership lasted for about two years. From 1923 to 1924, Gornall was listed with fellow architect, William P. Lodge.<sup>16</sup>

In 1924, it appears he went into practice on his own but in 1929 partnered with Joseph Shaughnessy, Sr., for a brief time. After 1934, Gornall’s name could not be located in the city directory. Further information concerning Robert Gornall’s public and private life has not, to date, been located.<sup>17</sup>

The drawings for the design of the Barclay Building were completed in 1924. At the time, the building was only known as the Business Building for South Broadway Realty Company. Robert Gornall had already planned to set up his practice as his drawings for the second floor space clearly shows his office space set with a reception

Garrett Building to the Barclay Building.<sup>20</sup> Between 1932 and 1938 the building was known as the National Savings Building, no further information could be found for this company. By 1939 the building was again listed as the Barclay Building.<sup>21</sup>

**Barclay and Barclay Furniture Company**

Besides a ten-year lease and having a building on Broadway named for their firm, very little information was found on John W. and Wilbur J. Barclay. John Barclay was listed as the treasurer of Standard House Furnishings Co. located at 1109 McGee in 1913. In 1914 John's occupation was listed only as furniture salesman. By 1916, John and Wilbur were listed as co-owners of Barclay and Barclay Furniture as a furniture repair shop and later the listing changed to upholstery and antiques. By 1922, Wilbur's address indicated that he had moved to Oklahoma City, Oklahoma. However, the name of the company remained the same. Their early business was located on Main Street until the company moved to the Barclay Building in 1925. By 1929 Barclay and Barclay were no longer listed in the directory and Broadway Furniture Company had taken over the space in the Barclay Building. In 1935 Minnie Barclay, John's wife, was the only listing. She was listed as the "widow of John W. Barclay of Barclay Furniture."<sup>22</sup> By 1942 Minnie was no longer listed at 4824 Brooklyn, which had been their home since c.1920.
