National Register of Historic Places Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in National Register Bulletin, *How to Complete the National Register of Historic Places Registration Form*. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. **Place additional certification comments, entries, and narrative items on continuation sheets if needed (NPS Form 10-900a).**

1. Name of Property

historic name Simpson-Yeomans/Country Side Historic District (Boundary Increase II)

other names/site number N/A

2. Location

street & number E. 52nd Street, Brookside Boulevard, Oak Street, East 57th Street, Main N/A not for publication

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended,

I hereby certify that this X nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60.

In my opinion, the property X meets does not meet the National Register Criteria. I recommend that this property be considered significant at the following level(s) of significance:

national statewide X local

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

☒ A Property is associated with events that have made a significant contribution to the broad patterns of our history.

☐ B Property is associated with the lives of persons significant in our past.

☒ C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.

☐ D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply.)

Property is:

☐ A Owned by a religious institution or used for religious purposes.

☐ B removed from its original location.

☐ C a birthplace or grave.

☐ D a cemetery.

☐ E a reconstructed building, object, or structure.

☐ F a commemorative property.

☐ G less than 50 years old or achieving significance within the past 50 years.

Simpson-Yeomans/Country Side Historic District
(Boundary Increase II)
Jackson County, Missouri

SUMMARY

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) will add 379 contributing resources to the existing 192 contributing resources that comprise the Simpson-Yeomans/Country Side Historic District. The fourteen blocks in Boundary Increase II lie just east of the current District boundary, and are bounded by Main Street and Brookside Boulevard, East 52nd and East 57th Streets. Near the south end of the area, the boundary increase extends east to Oak Street along East 55th Terrace and the north side of East 56th Street. One- to two-and-one-half story single-family dwellings and their associated outbuildings line the blocks of Boundary Increase II. All of the contributing resources were constructed between 1907 and 1930 in the popular residential styles of the day. The contributing resources exhibit the same continuity of development and design as the buildings currently in the District, matching the architectural styles, setting and period of construction of the existing resources. The 379 contributing resources include 228 single dwellings and 151 secondary structures or garages. One single dwelling was previously listed in the National Register of Historic Places.ⁱⁱ Of the twenty-four non-contributing resources in Boundary Increase II, four resources, all single dwellings, were substantially altered and no longer retain sufficient integrity to communicate their associations with the period of significance. The remaining twenty resources, including seven single dwellings and thirteen secondary structures, were constructed outside the period of significance and reflect a shift in architectural styles. The addition of these resources to the Simpson-Yeomans/Country Side Historic District supports the context developed in the original nomination and in Boundary Increase I and documents the entirety of the residential neighborhood incorporated as the Country Side Homes Association.

ELABORATION

Setting

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) contains roughly fourteen blocks bounded by East 52nd Street on the north, Main Street on the west, East 57th Street on the south, and Brookside Boulevard on the east. A small section extends east of Brookside Boulevard to Oak Street to incorporate the resources along East 55th Terrace and the north side of East 56th Street. The tree-lined streets follow the contours of the land while maintaining the orthogonal grid of the city. Grand Street and Westover Road wind through small portions of the district following the neighborhood's gently rolling hills. While Main Street runs north-south along the west boundary, Brookside Boulevard is a wide thoroughfare that bends and curves to follow the natural and manmade features that existed on the site at the time of construction. The east-west streets slope down from Main Street toward Brookside Boulevard.

ⁱⁱ The dwelling at 54 East 53rd Terrace was listed in the National Register of Historic Places 8 September 1983 under the "Residential Structures of Mary Rockwell Hook" Thematic District. The garage was not included with the dwelling in the thematic district. The garage is contributing and is included as such in the current resource count. Mary Rockwell Hook was one of Kansas City's early female architects.

National Register of Historic Places Continuation Sheet

Section number 7 Page 2

Simpson-Yeomans/Country Side Historic District
(Boundary Increase II)
Jackson County, Missouri

Most of the blocks in Boundary Increase II contain narrow, rectangular lots. However, the divergent streets, such as Grand Street and Westover Road, create irregular lots with oblique angles. Each lot contains a single dwelling and often a small outbuilding, such as a detached garage or shed. There are 164 outbuildings. Concrete or asphalt driveways lead from the street to the garages. Some properties have their own driveways while others share a driveway, and sometimes a garage, with the adjacent property. The lots themselves are relatively flat around the dwellings but slope gently down to the sidewalk to meet the prevailing grade of the street. The lots closest to Brookside Boulevard are the flattest in the District. Many houses have concrete stairs and walkways that lead from the public sidewalk to the main entrance of the house. Nearly all of the lots maintain the uniformity of setbacks on the primary frontage.

Concrete sidewalks with narrow easement strips, often planted with street trees, line the streets in the boundary increase. Grassy lawns landscaped with mature trees, shrubs, and small plants surround each dwelling. Some properties have gardens of ornamental and functional plantings.

The respect for the natural topography demonstrated by the street grid and the uniformity of scale and setbacks presented by the buildings are features shared with the existing District and illustrate the original development concept designed by J. C. Nichols and the Nichols Company for the area.

Design

Much like the current District, Boundary Increase II displays a wide variety of building designs that reflect the wealth of architectural styles popular during the early decades of the twentieth century. The vast majority of resources (97%) were constructed between 1907 and 1930. Thirty-nine homes (16%) were built in 1910, at the height of construction in the boundary increase. The remaining seven dwellings were constructed between 1952 and 2007.

The houses are predominantly frame construction, sided with stucco, wood, brick, or stone veneer, or a combination of these materials. The most common siding material in the boundary increase is stucco. Few resources have synthetic replacement siding. Limestone is a nearly ubiquitous foundation material. Most roofs are composite shingles, although a few resources have wood shingle or clay tile roofs. Wood and stone are the most common decorative materials, and are often used to define specific architectural styles, such as Tudor Revival or Craftsman.

The Prairie School and Craftsman styles are the most common architectural genres in Boundary Increase II, with numerous examples of the American Foursquare subtype and the vernacular Kansas City Shirtwaist variant. Colonial Revival is the most common early-twentieth century revival style in the nominated area. There are also examples of Tudor Revival and Classical Revival designs.

Most of the secondary structures in Boundary Increase II stand at one of the rear corners of the building lot. The façade material and roof shape are the only significant architectural features and they often

National Register of Historic Places Continuation Sheet

Section number 7 Page 3

Simpson-Yeomans/Country Side Historic District
(Boundary Increase II)
Jackson County, Missouri

mimic the style of main house. Forty-seven houses have attached garages. Many of these are historic features integrated into the foundation of the house.

Integrity

Boundary Increase II is a highly intact residential neighborhood that reflects the vision of one of Kansas City's most prolific and prominent residential developers, J.C. Nichols. It retains sufficient integrity of location, setting, design, materials, and workmanship to convey its associations with its period of significance. The resources illustrate the wide variety of architectural styles popular in the early decades of the twentieth century. The configuration of streets illustrates J.C. Nichols' original design intent of letting the topography influence street layout, rather than strictly adhering to the standard right-angle street grid. In the century since the first house was constructed, trees have matured, emphasizing the harmonious quality of nature and development.

Of the 404 additional resources in Boundary Increase II, only 24 are considered Non-Contributing and one was previously listed in the National Register. Twenty of the non-contributing resources (seven single dwellings and thirteen secondary structures) were constructed outside the period of significance. The seven single dwellings reflect a dramatic shift in architectural styles. These are scattered throughout the nominated area and reflect the continuing story of residential evolution in the neighborhood. The four non-contributing resources constructed during the period of significance underwent substantial alterations that compromise the integrity of the resources, overwhelming or obscuring the character-defining features. Although many resources in Boundary Increase II retain their historic wood windows, window and door replacement are common alterations that do not necessarily compromise the overall integrity of the resource and its contributing status. Likewise, the presence of replacement siding does not necessarily render a resource non-contributing if the identifying architectural features remain legible.

The individual property descriptions below include the property address, its contributing or non-contributing status, and the date of construction. The historic name, based on the original owner, is listed, if known. The architect and/or builder are listed, if known. The architectural style is also included.

Individual Property Descriptions

1. 3 East 52nd Street	Contributing
Wallace J. Ferry Residence	1912
Architect: Shepherd & Belcher	Builder: J.C. Nichols Company
Colonial Revival	

This 2 1/2 story Colonial Revival dwelling has a limestone foundation, stucco walls, and an asphalt shingle side gable roof. A shallow arched dormer rises out of the center of the north roof slope. The front (north) facade is symmetrical around the center entry vestibule. The stucco-clad vestibule projects outward slightly from the facade and has a battered sides and a shallow arched hood over the shallow arched opening. The historic wood door fills the opening. The outer bays on each story contain tripartite Chicago Style windows with narrow outer sashes flanking a wide center sash. The center bay on the second story contains two multi-light fixed or casement sashes. The double-hung wood windows have

National Register of Historic Places
Continuation Sheet

(Boundary Increase II)
Jackson County, Missouri

multi-light upper sashes. The dormer contains a tripartite Chicago Style window with multi-light sashes. A hipped roof covers the one-story wing attached to the east elevation.

A one-car garage with a front gable roof stands at the southeast corner of the lot facing west. The driveway connects to Main Street rather than East 52nd Street.

2. 11 East 52nd Street Contributing
Henry J. Owens Residence 1923
Architect: Harry S. Bill
Tudor Revival

This two-story Tudor Revival dwelling has a limestone foundation, stucco walls, and an asphalt shingle roof. The steeply pitched front gable roof has jerkinhead ends and wood soffits. A shed roof rises from the west roof slope. The front (north) facade has three bays on the first story and two bays on the second story. The entry vestibule at the east end of the front facade projects forward and has a hipped roof. Brick laid in a herringbone pattern clads 2/3 of the vestibule walls while the top third is multi-paned glass. The center bay has a tripartite window with sashes of equal width. The west bay has a round-arched opening with a brick sill. The west end of the house has a screened-in porch that is incorporated under the primary roof. The second story has one single and one paired window. The double-hung wood windows have multi-light upper sashes. A brick interior chimney rises through the roof at the north end of the west side of the house where the main block of the house meets the porch.

A two-car garage with wood siding and a flat roof with a peaked parapet stands at the southeast corner of the lot.

3. 15 East 52nd Street Contributing
Rev. Claudius B. and Mary Spencer 1908
Architect: unknown
Craftsman

This 2 1/2 story Craftsman dwelling has a limestone foundation and an asphalt shingle side gable roof. Stone clads the first story and wood shingles clad the upper stories. A gabled dormer projects from the roof at the center of the front (north) facade. An exterior stone chimney attaches to the east facade. The first-story windows and doors are not historic. The double-hung wood windows at the second story have multi-light upper sashes.

4. 17 East 52nd Street Contributing
Walter G. and Mattie Basinger Residence 1915
Architect: Shepard & Farrar Builder: J.C. Nichols Company
Colonial Revival

This 2 1/2 story Colonial Revival dwelling has the hipped roof, massing, and facade arrangement that communicate the American Foursquare subtype along with decorative features of the Colonial Revival. The house has a brick foundation, wood lap siding, and an asphalt shingle hipped roof with a single hipped dormer rising from the south roof slope. Tapered wood columns support the entablature and flat roof of the entry portico. A low wood wall encloses the narrow balcony atop the portico. Wood columns also support the flat roof over the porch on the east elevation. A low wood railing encloses the side porch. The first story of the front (north) facade contains the wood door and surround of the main entry and two single windows. The second story contains one single and one paired window. The double-hung wood

Jackson County, Missouri

windows have multi-light upper sashes. The dormer contains a single window with a three-over-three wood sash. The projecting bay stairwell on the west elevation contains three windows of varying heights. Exterior chimneys rise above the rooflines on the east and west elevations.

A one-car garage with wood doors and a hipped roof stands at the southeast corner of the lot.

5.	21 East 52nd Street	Contributing
	Louis R. Caffery Residence	1908
Architect:	unknown	Builder: Butler-Weaver Realty Co.
	Craftsman	

This 2 1/2 story Craftsman dwelling has a limestone foundation and asphalt shingle front gable roof. Natural rustic stone clads the first story and stucco clads the second story, communicating the vernacular Kansas City Shirtwaist style. An asymmetrical porch wraps around the front (north) and east elevations. Massive stone posts support the front gable porch roof. Exaggerated wood brackets in the front gables and the rustic stone chimney centered on the front (north) facade are elements of the Craftsman style. The house retains wood soffits and double-hung wood windows with multi-light upper sashes.

A small shed with wood siding and a gambrel roof stands at the southeast corner of the lot.

6.	25 East 52nd Street	Non-Contributing
	Charles O. Barr Residence	1964
Architect:	unknown	Builder: Dierkson Homes
	Modern Movement - Split Level	

This 1 1/2 story Modern Movement - Split Level house has a poured concrete foundation and an asphalt shingle roof. Brick clads the first story of the front (north) facade and vinyl siding clads the rest of the house. The east wing has a side gable roof and the north wing has a hipped roof. The front (north) facade of the east wing has the single entry and a bay window. The north facade of the north wing has two single windows and a shallow balcony with ornate wrought iron supports and railings. The double-hung windows have six-over-six sashes. A two-car garage is integrated into the lower level of the north facade of the north wing. While the resource retains integrity, it was constructed outside the period of significance and is therefore non-contributing.

7.	31 East 52nd Street	Contributing
	Luman H. Cochrane Residence	1911
Architect:	Clyde F. Mack	Builder: Clarence L. Brown
	Prairie School	

This two-story Prairie School dwelling has a limestone foundation, stucco walls, and an asphalt shingle hipped roof. Wide overhanging eaves encircle the house. A screened-in porch with stone posts supporting the hipped roof attaches to the east elevation. The stucco-clad entry at the west end of the front (north) facade projects from the wall, containing the multi-light wood door and hipped roof. The first story contains a single window grouping composed of multi-light casement windows flanking a fixed single-pane window. The second story contains a band of four casement windows centered on the facade. An interior stone chimney rises above the roofline at the center of the house.

A two-car garage with a hipped roof stands at the south end of the lot.

8. 35 East 52nd Street
Burr S. Stottle Residence
Architect: unknown
Craftsman

Contributing
1921

Builder: Carl A. Brand

This 1 1/2 story Craftsman bungalow has a limestone foundation, stucco walls, and an asphalt shingle side gable roof. Two small gable dormers rise from the north roof slope and one large gable dormer rises from the south roof slope. Stucco-clad posts on stone bases support the shed roof over the full-width front porch. Low stone walls enclose the screened-in porch with its gabled pediment over the entry. The front (north) facade has paired windows flanking the original wood door of the center entry. The secondary elevations have single and paired windows of varying sizes. The double-hung wood windows have multi-light upper sashes. The front dormers have three fixed multi-light windows. An exterior brick and stone chimney rises through the roofline at the north end of the east elevation.

A two-car garage with a front gable roof sits at the southeast corner of the lot facing west.

9. 39 East 52nd Street
John & Lucie Crandall Residence
Architect: unknown
Craftsman

Contributing
1908

Builder: Butler-Weaver Realty Co.

This two-story Craftsman dwelling has a brick foundation and asphalt shingle front gable roof. Painted brick clads the first story and wood lap siding clads the second story, communicating the vernacular Kansas City Shirtwaist style. An asymmetrical porch wraps around the front (north) and east elevations. Brick posts support the front gable porch roof. Exaggerated wood brackets in the front gables are elements of the Craftsman style. The house retains wood soffits and double-hung wood windows with multi-light upper sashes. An exterior brick chimney on the west elevation extends above the roofline.

A two-story two-car garage with a front gable roof stands at the center of the south end of the lot. This garage appears to have been constructed outside the period of significance and is therefore non-contributing.

Architect: unknown	Builder: Elihu W. Hayes
Prairie School	

This two-story Prairie School dwelling has a limestone foundation, stucco walls, and an asphalt shingle hipped roof with a small hipped monitor at the apex. Wide overhanging eaves with vinyl soffits encircle the house and the porch. Battered stucco-clad posts support the hipped roof over the full-width front porch. Low stucco walls enclose the porch. Single windows flank the non-historic wood door on the first story of the front (north) elevation. The second story has two single windows. The double-hung wood windows have multi-light upper sashes. An exterior brick and stucco chimney rises through the roofline on the west elevation.

A one-car garage with a hipped roof stands at the northwest corner of the lot.

16. 9 East 53rd Street	Contributing
Charles J. Settel Residence	1909
Architect: unknown	Builder: Orr H. Gray
Craftsman	

This 2 1/2 story Craftsman dwelling has a limestone foundation and an asphalt shingle cross gable roof. Stucco clads the first story. Wood shingles clad the second story. Stucco with false half-timbering fills the gable ends. The roof has wide, overhanging eaves with wood soffits, exposed rafter ends, and wood brackets. Stone posts support the shed roof over the full-width front porch. The front (north) elevation of the first story contains the main entry set between a small window with diamond-shaped muntins, and large window operable with flanking fixed sidelights. The second and attic stories contain centered paired windows. The house retains its original wood door and one-over-one wood windows.

A one-car stucco garage with a front gable roof stands at the southwest corner of the lot.

17. 10 East 53rd Street	Contributing
John H. Gregory Residence	1920
Architect: unknown	Builder: Elihu W. Hayes
Prairie School	

This two-story Prairie School dwelling has a limestone foundation, wood lap siding, and an asphalt shingle hipped roof. Wide overhanging eaves encircle the house and porch. Grouped wood posts support the hipped roof over the full-width front porch. A low wood railing with rectangular balusters encloses the porch. The symmetrical front (south) facade has three bays on the first story and two bays on the second story. Single windows flank the wood door on the first story. The second story has two single windows. An exterior brick chimney rises through the roofline at the south end of the west elevation.

Craftsman	

This 1 1/2 story Craftsman bungalow has a brick foundation and an asphalt shingle front gable roof. A gabled monitor rises from the primary roof at the south end of the house. The front porch that wraps around the northeast corner of the house has a cross gable roof. Brick support posts and low brick walls enclose the screened-in porch. The front facade within the porch has a single window and the historic wood door. The front facade outside of the porch has a paired window. The double-hung wood windows have multi-light upper sashes and painted shutters. The gable end over the porch has a multi-light fixed window. The porch screening was added since 1940.

A two-car garage with a side gable roof stands at the southeast corner of the lot. This garage appears to have been constructed outside the period of significance and is therefore non-contributing.

The house has a limestone foundation, stucco walls, and an asphalt shingle hipped roof with hipped dormers on the north and south elevations. Stone and wood posts support the shed roof over the full-width front porch. The front gable at the center of the porch roof is clad with wood shingles and contains a pent roof at the base of the gable. The first story contains three bays with the wood door in the west bay and narrow multi-light windows. The second story contains two single windows. The dormer contains one multi-light window. An exterior stone chimney attaches to the east elevation.

A two-car garage with wood shingles and a hipped roof stands at the northeast corner of the lot.

Architect: Mary Rockwell Hook
Craftsman

This house is designed as a compact, rectangular residence which presents its narrower face to the street. Covering an open porch (later enclosed), the asymmetrical roof rakes down from its ridge. Two shed roofs pierce the east roof slope. Casement windows (non-original) are utilized throughout the first floor, a band of five projecting slightly on the front facade. Above this is a narrow balcony connected to the master bedroom by French doors. The original brown wooden shingles are covered with asbestos siding. Mrs. Hook characterized the plan as following "the latest trends in California cottages." She was probably referring to the type of verandahed bungalows, designed by Greene & Greene. The house was listed in the National Register of Historic Places 8 September 1983 under the "Residential Structures of Mary Rockwell Hook" Thematic District.

There is a two-car garage in the rear with a side gabled roof with composition shingle and vinyl siding. The garage was not included in the thematic district nomination but it is contributing to Boundary Increase II.

Tudor Revival

Contributing
1925

This two-story Tudor Revival dwelling has a brick foundation, stucco walls and an asphalt shingle side gable roof. A complex dormer with front gables flanking a center shed roof rises from the north roof slope. The symmetrical front (north) facade, with three bays on each story, communicates the Colonial Revival influence, but the steeply pitched roof and false half-timbering in the gable ends communicates the Tudor Revival style. The center entry has a non-historic wood door, a brick surround, and an arched hood. The center bay on the second story has small paired windows. The outer bays on each story have single windows. The first story windows have simple brick surrounds. The double-hung wood windows have one-over-one sashes. The one-story east wing of the L-shaped house has a gabled roof with half timbering. A rounded bay at the center of the first story on the rear (south) elevation has a flat roof. An interior brick chimney rises through the roof at the ridge of the primary roof on the east elevation. A one-car garage is integrated into the lower level on the front (north) facade. The stone garage with an arched opening supports a patio above with a wrought iron railing.

Colonial Revival

This 2 1/2 story Colonial Revival dwelling has a limestone foundation, painted wood shingles, and an asphalt shingle side gable roof with three dormers on the north and south elevations. The symmetrical front (north) facade contains single windows flanking the center entry on the first story and single windows flanking a smaller center window on the second story. The dormers each contain a single window. The double-hung wood windows have multi-light upper sashes. The wood door with flanking sidelights and simple wood surround form the main entry on the front facade. Wood posts support the hipped roof over the screened-in porch on the east elevation. An exterior stone chimney rises above the ridge on the east elevation. The south elevation of the L-shaped house has a two-story gabled wing.

A two-car garage with wood shingles and a front gable roof stands at the southwest corner of the lot.

Colonial Revival

This 2 1/2 story Colonial Revival dwelling has a poured concrete foundation, stucco walls, and an asphalt shingle side gable roof. A single gabled dormer rises from the north roof slope. The two-story south wings of the U-shaped house have gabled roofs. Wood posts support the pedimented gable roof over the full-width front porch. Low wood railings with starburst balusters enclose the porch. The symmetrical front (north) facade has three bays on each story. The multi-light front door with sidelights occupies the center bay. A small tripartite, vaguely Chicago Style, window fills the center bay on the second story. Paired windows fill the outer bays on both stories. The dormer has a tripartite window with sashes of equal width. The windows have multi-light upper sashes, although they are not true divided lights. A two-car garage with stucco walls and a front gable roof attaches to the southwest corner of the house. A multi-light fixed window fills the gable end of the garage. While the resource retains integrity, it was constructed outside the period of significance and is therefore non-contributing.

Builder: John V. Walker

This 2 1/2 story Craftsman dwelling has a limestone foundation that rises to clad the first story walls. The upper story walls are shingled, creating the Kansas City Shirtwaist vernacular style. Asphalt shingles cover the gable front roof, which has wide eaves and decorative brackets. Gabled dormers rise from the east and west roof slopes. A gable front porch projects from the southeast corner of the massing and extends along the east side of the house. There is a projecting oriel window on the west elevation. Double-hung wood windows have a one-over-one configuration. They are arranged singly, except in the gable peaks and dormers where they are tripled. There is a one story addition on the rear elevation.

A one-car garage with a front gable roof stands at the southeast corner of the lot.

This two story Colonial Revival dwelling has a limestone foundation, clapboard walls, and an asphalt shingle side gable roof. The roof has boxed eaves and cornice returns in the gable end. Pedimented dormers, with a medallion in the gable peak, rise through the center of the north and south roof slopes. Exterior brick chimneys rise on the side walls just north of the ridge. A full-width porch spans the symmetrical front (north) facade. The porch has heavy Doric columns, a wide frieze, and mutules. A wood railing encircles the porch roof. The wood front door has slender multi-light sidelights. Double-hung windows have multi-light upper sashes. They are arranged singly, except for a pair of small windows at the center of the facade. A two-story addition spans the rear elevation.

A shared two-car garage with a front gable roof stands at the southeast corner of the lot. The garage is shared with 27 East Concord Avenue.

Builder: Clarence D. Remely

This 1 1/2 story Craftsman has a limestone foundation, stucco walls, and a side-gabled asphalt shingle roof. A complex dormer (shed with a central front gable) with false half-timbering fills most of the south roof slope. There is also a similar dormer on the rear of the house. The full-width porch is integrated below the wide sloping roofline. The limestone foundation rises to form the porch railing. A small gable-front projection marks the porch entrance. Groups of square posts support the porch roof, and brackets adorn the eaves on all elevations. The house has double-hung wood windows and a wood front door.

A two-car shared garage with vinyl siding and a flat roof with double front gable parapet stands at the northeast corner of the lot.

This 2 1/2 story Prairie School dwelling has a limestone foundation. Rough-textured limestone clads the first story walls. The upper story walls are clapboard, creating the Kansas City Shirtwaist vernacular style. Asphalt shingles clad the steep hip roof. Single hip dormers rise at the center of each roof slope. The wide soffits are vinyl. A full-width porch spans the south facade. Rough limestone piers rise from the foundation to support the outer corners of the porch roof. Double-hung windows have multi-light upper sashes. They are arranged singly, except in the dormer, where the windows are paired. The wood front door has sidelights.

A two-car shared garage with vinyl siding and a flat roof with double front gable parapet stands at the northwest corner of the lot.

SUMMARY

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) is significant under National Register Criterion A for the area of COMMUNITY PLANNING AND DEVELOPMENT and under National Register Criterion C for the area of ARCHITECTURE. The 379 contributing resources (404 total resources) between Main Street and Brookside Boulevard, East 52nd and East 57th Streets, Kansas City, Jackson County, Missouri, were constructed in the same time period and exhibit the same character-defining features as the contributing resources in the original district and in the 2000 Boundary Increase, adjacent to the west.ⁱⁱⁱ Boundary Increase II encompasses the Rockhill Park, Rockhill Park Extension, Rockhill Place, and Bowling Green subdivisions, platted between 1907 and 1911. While they were not part of the historic Simpson family property, they were also developed by J.C. Nichols and L.R. Wright and embody the same planning concepts, scale of construction, and building materials as the current district. In 1924 the subdivisions in Boundary Increase II formally joined with the subdivisions of the existing district to create the Country Side Homes Association. Boundary Increase II expands the boundaries of the existing district to incorporate all of the single-family residential neighborhoods historically associated with the Country Side Homes Association. Together, the listed district and Boundary Increase II form a visually cohesive neighborhood. Like the original district and Boundary Increase I, Boundary Increase II contains excellent examples of architect-designed residences that express a wide variety of formal and vernacular architectural styles popular in Kansas City during the period of significance. Although no specific period of significance was stated in the original nomination, Boundary Increase I defines the period of significance as beginning in 1908 with the earliest date of construction, and ending in 1950, the fifty-year closing date for periods of significance where activities begun historically continue to have importance but no more-specific date can be defined. The period of significance for Boundary Increase II begins in 1907 and ends in 1930, the earliest and latest dates of construction for contributing resources.

ELABORATION

HISTORY OF BOUNDARY INCREASE II

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) expands the boundaries of the existing district to include fourteen blocks east of the current district boundary. The nominated area includes the Rockhill Park, Rockhill Park Extension, Rockhill Place, and Bowling Green subdivisions. The nominated subdivisions represent the earliest platted residential subdivisions developed by Jesse Clyde (J.C.) Nichols in the Country Club District of Kansas City, Missouri and illustrate his vision for neighborhood planning and design. Notable features include streets adapted to the topography and blocks laid out with a dominant east-west orientation.

ⁱⁱⁱ The Simpson-Yeomans/Country Side Historic District was listed in the National Register of Historic Places 6 September 1984; Simpson-Yeomans/Country Side Historic District (Boundary Increase) was listed in the National Register 26 May 2000.

(Boundary Increase II)
Jackson County, Missouri

The Rockhill Park subdivision, platted in April 1907, includes five blocks bounded by Main Street and Brookside Boulevard, East 53rd and East 55th Streets. This was the second plat that Nichols filed and his first subdivision to incorporate streets that respected the contours and natural features of the land. William Rockhill Nelson had pioneered this concept in Kansas City a few years earlier. Rockhill Road, a tree-lined boulevard, winds up and down gentle hills through Nelson's Rockhill residential neighborhood, which straddles Brush Creek east of Oak Street.^{iv} Nichols incorporated the prominent "Rockhill" name along with the development concept in the Rockhill Park plat. In the plat Nichols arranged Brookside Boulevard to follow a meandering streambed that lay just east of the subdivision and parallel to the Dodson dummy railroad right-of-way. The strong north-south curves of the boulevard prompted Nichols to lay out blocks with a dominant east-west orientation rather than the conventional north-south orientation.^v In order to maintain local street-naming practices, intermediate east-west streets were inserted between the numbered streets. Some of these streets retain their original names, such as Concord Avenue, while others have been renamed with a "Numbered Street Terrace" convention. Berkley Avenue, for instance, is now East 54th Terrace.

In November 1907, Nichols filed a plat for the Rockhill Place subdivision, extending north of Rockhill Park to East 52nd Street. Grand Street, the east boundary of Rockhill Place, curves westward up and over a slight hill. Rockhill Park Extension, also filed in 1907, re-platted the east end of the northernmost block in Rockhill Park, including the small island between Grand Street and Brookside Boulevard.

Another local developer, L.R. Wright, filed a plat for the Bowling Green subdivision in March 1911. This subdivision includes four blocks bounded by Main Street, Brookside Boulevard, East 55th and East 57th Streets, and the blocks between Brookside Boulevard and Oak Street along East 55th Terrace and the north side of East 56th Street. The terrain is much flatter between East 55th and East 57th Streets, and thus there was little need to alter the street grid to respond to the topography. Brookside Boulevard cuts through the subdivision creating angled lots on the adjacent blocks. Wright maintained the east-west orientation of numbered Streets and Terraces as established by Nichols. The lots in Bowling Green are slightly wider than those in the Nichols subdivisions, resulting in slightly larger houses.

J.C. Nichols initiated the formation of neighborhood homes associations once each subdivision had a sufficient number of residents. The Country Side Homes Association met for the first time on April 15, 1924. At first the Association included only the properties in the South Country Side and Bowling Green subdivisions, between Wornall Road and Oak Street, from 55th to 57th Streets. By the end of the year the Country Side, Country Side Extension, Rockhill Park, and Rockhill Place subdivisions had also joined the Country Side Homes Association.^{vi}

Jackson County, Missouri

Nichols wanted to develop upscale residential neighborhoods. Beginning with Rockhill Park, he filed deed restrictions with the plats. These were designed to attract a specific type of homeowner in order to create a "respectable" neighborhood standard. The deed restrictions prohibited commercial land uses; placed racial restrictions on property ownership; established a minimum value for house construction (between \$2,000 and \$5,000); specified a front yard setback of 30 - 40 feet; and prohibited billboards, privies, and raising hogs.^{vii} The minimum cost provision would prohibit the construction of smaller homes, while the setback requirements would ensure a consistent streetscape and promote neighborhood cohesion.

Wright filed three standard deed restrictions with his Bowling Green subdivision: minimum construction costs, prohibition of billboards, and racial restrictions for property owners. While these restrictions were significantly fewer than those of Nichols subdivisions, when Bowling Green joined the Country Side Homes Association the residents elected to adopt the stricter Nichols deed restrictions.^{viii}

Like the residents of the listed district, the original residents in Boundary Increase II held a wide variety of occupations. Many were prominent members of Kansas City's commercial and professional community. Business owners, managers, and vice presidents made their homes in the Country Side neighborhood. Doctors, engineers, grocers, railroad ticket agents, and salesmen also resided here. The size and stature of homes in the District reflects this range of middle and upper incomes.^{ix}

ARCHITECTURE

Like the buildings presently within the district boundaries, the nominated area reflects the variety of architectural styles and design preferences popular in Kansas City during the first decades of the twentieth century. The Prairie School, Craftsman, Colonial Revival, Classical Revival, and Tudor Revival styles, all common in the original nomination and Boundary Increase I, are also well-represented in Boundary Increase II. While the nominated resources employ styles that were popular nationwide, there are also excellent examples of local interpretations and influences. While the secondary structures do not employ formal architectural styles, they often incorporate simplified stylistic features borrowed from the main house, such as façade material and roof shape.

The seven resources constructed outside the period of significance are scattered throughout Boundary Increase II. The six resources identified as Modern Movement include four Split Level dwellings, one simple Ranch house, and one Minimal Traditional residence. One Colonial Revival dwelling was constructed in 2007. Although they fall outside the period of significance, most of these resources retain integrity and reflect the on-going evolution of the residential neighborhood.

^{vii} Worley, 33.

^{viii} Worley, xvi. A similar scenario arose in Wright's unsuccessful Westwood Park development, just north of Nichols' Sunset Hill neighborhood. Platted in 1913 with Wright's three standard deed restrictions, many of the lots in the small subdivision remained unsold eight years later. Nichols purchased the undeveloped lots in 1921, imposed his more-restrictive covenants, and sold more lots in one month than Wright had to date (Worley, 132). Worley, 133.

Tudor Revival	7
Classical Revival	1

Architects and Builders

Several prominent Kansas City architects designed residences in Boundary Increase II. These designs expressed a range of popular styles, illustrating the designers' familiarity with local and national architectural trends. Houses in Boundary Increase II include the work of Frederick Gunn (21 East Concord Avenue), Selby Kurffis (28 East 56th Street), and Smith, Rea & Lovitt (42 East 55th Terrace). Clarence E. Shepard, Harry S. Bill, and Michaelis & Eyssell each designed four residences in the nominated area, and Owen & Payson, Alice G. Jackson, and Elmer Boillot each designed two residences.

Building permits listed 178 different builders for the resources in Boundary Increase II. Many of these builders constructed only one residence in the District while fourteen builders (listed above) constructed two or more residences.

Clyde F. Mack was the most prolific architect in Boundary Increase II, designing thirteen Colonial Revival and Prairie School residences between 1910 and 1913. Mack employed builder Clarence L. Brown to erect all but one of these residences. Brown was a very popular builder in the nominated area and is associated with a total of 45 residences. Independently and together, Clyde F. Mack and Clarence L. Brown designed and built stately residences for Kansas City's prominent businessmen and merchants throughout the first quarter of the twentieth century.

Clyde F. Mack

Clyde Frederick Mack was born in Hillsdale, Iowa in 1887. By 1904 he had moved to Kansas City and was employed as a draftsman. Mack worked for various architects around Kansas City in this capacity for seven years, including two years with Wilder & Wight in 1909 and 1910. He began an independent practice around 1910, at which time he shared office space downtown in the R.A. Long Building with builder Clarence Brown. Mack continued his solo practice from offices in Midtown Kansas City from 1914 – 1920. In 1920 he became Chief of Staff for the prominent architecture firm Keene & Simpson and in 1945 joined the office of architects Marshall & Brown. In 1955 Mack moved to Chattanooga, Tennessee where he again started his own office. Mack died in 1994.^x

Clarence L. Brown

Clarence L. Brown first appears in the 1907 city directory, working in the real estate field. He switched to the construction field the following year. Brown shared office space with Clyde Mack from 1910 – 1913, after which he disappears from city directories.^{xi}

CONCLUSION

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) expands the boundaries of the existing district to incorporate all of the single-family residential neighborhoods historically associated with the Country Side Homes Association. The nominated area reflects the same neighborhood planning concepts as well as the same quality and variety of architecture present in the current district. The 379 contributing resources (404 total^{xii}) were designed using many of the architectural styles popular at the time they were constructed. Boundary Increase II, along with the existing district, reflects a cohesive upscale residential neighborhood formally planned in the early decades of the twentieth century.

^{xi} City Directories for Kansas City, Missouri, 1900 – 1956, Microfilm, Missouri Valley Special Collections, Kansas City Public Library.

^{xii} The 404 total resources include the dwelling at 54 East 53rd Terrace, previously listed in the National Register.

Jackson County, Missouri

VERBAL BOUNDARY DESCRIPTION

The Simpson-Yeomans/Country Side Historic District (Boundary Increase II) is bounded by East 52nd Street on the north, Main Street on the west, and East 57th Street on the south. The east boundary is Brookside Boulevard, except where it jogs east to Oak Street along East 55th Terrace and the north side of East 56th Street.

BOUNDARY JUSTIFICATION

Simpson-Yeomans/Country Side Historic District (Boundary Increase II) includes all of the blocks in the Rockhill Park, Rockhill Park Extension, Rockhill Place, and Bowling Green subdivisions with two exceptions, described below. These three contiguous subdivisions, along with the subdivisions that comprise the Simpson-Yeomans/Country Side Historic District and Boundary Increase I, form the Country Side Homes Association. The Nichols Company organized the Country Side Homes Association in 1924 to protect the upscale character of these developments, which were among the earliest in Kansas City's new Country Club residential area. The boundaries of the neighborhood association (as represented by the three parts of the historic district) encompass a highly intact and cohesive residential neighborhood that has endured for over a century and that continues to embody the high-quality residential development that Nichols sought to create.

Boundary Increase II includes most of the land historically associated with the nominated plats. The north side of East 52nd Street is not part of the Country Side Homes Association and is not included in the District. The south side of East 55th Street between Brookside Boulevard and Oak Street is also excluded from Boundary Increase II because the block-long commercial development represents a property type that is distinct from the residential historic district.
