The main facade faces south. The dominate feature of the facade is a full front gable with an exterior chimney. The main entrance, a paneled wooden and glass door, is placed in a small gable projection. The entire door is framed by a brick sourround with keystone and voussoir. A shed roof two car attached garage has been added at a latter time. Fenestration is six-over-six light double hung sash windows on the second floor and a pair of four-overfour light, double hung sash windows with brick sills and lintels. A once open screened porch at the western end of the bay has been enclosed.

The main entrance is placed on an angle and faces southwest. A large projecting front gable is located near the western end of the facade. The main entrance is a wooden paneled door in a rounded arch frame. Brick corbelling supports an entablature which runs below a narrow gable. Shed dormers with paired windows are located in the roof area. Fenestration consists of four-over-four lights, double hung sash windows placed mostly in pairs. A flat roof double car garage was added to the western end of the facade and is connected by a flat roof breezeway.

This stone residence with red clay tile roof faces east. Fenestration is six-over-one double hung sash windows with stone sills. The first floor window on the north has stone voussoirs while the paired windows on the second floor central bay have cut stone quoining surrounds. The main entrance is recessed with a gable portico supported by columns. A wide eave supported by paired brackets. A three story exterior chimney is located on southside of the main facade. A porte cochere is located on the south facade of the residence. Three gable dormers are spaced evenly along the roof of the main facade. A tile shed roof supported by brackets protects the windows on the south end of the main facade.

## ATTACHMENT

#42

The main facade which is multi gabled faces south. The main entrance, a rounded arch wooden door is framed by a stone quoining surround. Directly above the entrance is a rounded arch window with alternating stone and brick voussoirs. A wrought iron balcony has been placed in front of the window. A front exterior chimney is located to the east of the main entrance. The chimney contains three decorative chimney pots. Stone quoining is used throughout the facade as a decorative motif - this can be seen around the windows, on the chimney and on the steeped central gable.

keystone lintels on the first floor and alternating stone and brick voussoir lintels on the second story. The windows are evenly spaced and those in the central section have shutters flanking them. A wide denticulated cornice runs around the entire building. Pedimented dormers with rounded arched windows are located in the roof area. The central three dormers are attached. On the first story of the side wings are french doors flanked by sidelights. The door surrounds are segmental arches supported by doric pilasters. Above the pilasters is a classical urn motif.

#42

The main facade faces south. Fenenstration consists of eight-over-eight lights, double hung sash windows in rectangular frames with stone sills. The windows on the first floor have brick voussoirs with stone keystone. The central section of the house has two story stone pilasters supporting a denticulated cornice and a roof line balustrade. Two fanlight dormers are located in the roof. The main entrace is a multi panel wooden door frame with a gable pediment. In each of the end bays, on the first floor are porches (one open; one enclosed). The frames to openings have an elipitical brick arch over them.

structure. Connecting the main structure with the garage section is a one story section housing two small multi pane casement windows separated by a brick herringbone decorative panel. To the west of this section is a one story wing housing the garage. It has a lancet window within a segmental arch frame. The roof is pyramidal in shape and capped with a modern type cupola.

inating wing, later addition, arched Italianate doors and windows.

INTERIOR

Only partial basement, under north-south section of house. First Floor: three parlors with fireplaces; dining room; kitchen; pantries; storage; two front stair halls, duplicates of each other, with geometrical open-string staircases. Second floor: five bedrooms, three with fireplaces; three baths. Attic: unfinished.

43. HISTORY AND SIGNIFICANCE (Cont'd)

of a Civil War engagement, the Battle of Westport, occurred at this locale on October 23, 1864. Exact date of construction undetermined, but this residence is one of few remaining Kansas City structures i.e. circa the Civil War, and a good example of vernacular adaptation of the Greek Revival style. Asa Beebe Cross, one of Kansas City's first architects and designer of many early buildings in the community, was either partially or wholly responsible for design and construction.

42 Further Description of Important Features The residence faces west onto Rockwell Lane, and is characterized by a series of steep gables projecting away from the rear wall surface. The residence features such Tudor-inspired motifs as half-timbering and stucco on the second story, and rusticated stonework at this corner of the building, and around the entrance.

43 History and Significance This was originally the home of Joseph H. Inness, a member of the Inness Brothers firm, potato merchants.

Description of Environment and Outbuildings This residence is sited on a hillside. Other residences are to the north, south, east and west.

22 Further Description of Important Features The main facade of this corner house faces south. This residence features characteristics of Tudor/Jacobean Revival architecture in its multiple and steeply pitched gables; the half-timbering on the gable surface; the combination of varying textures of brick and stone; and the prominent chimney. The entrance bay is centered, and features a recessed round-arched portal.

3) History and Significance This was originally the home of W. B. Jenkins, a realtor.

Description of Environment and Outbuildings A duplex is east of this building. To the north, south, and west are other residences. The house sits on a hillside lot.

- 42 Further Description of Important Features This residence is characterized by an unusual combination of construction, materials which include brick, stone, stucco, and slate. The massing (i.e. central projecting bay with two symmetrical wings on either side); the round headed windows, the quoining, and roof slopes are architectural features characteristic of the French Empire style.
- 43 History and Significance This house remained vacant for several years after its construction.

 This structure was developed by Ward Investment Co.
- 44 Description of Environment and Outbuildings This building is sited on a hillside lot. Other residences are to the east, west, north and south.

5 Other Name(s)

42 Further Description of Important Features The main facade of this house faces south. The entrance bay consists of a squat, projecting tower and the door is set in an arch decorated with a tile surround. Atypically, the rest of the fenestration is rectangular. Wrought iron grill work decorates a 2nd floor window at the west end of the south facade.

43 History and Significance This was originally the home of Harry A. Fowler, a grain broker.

44. Description of Environment and Outbuildings Other residences are east, west, south and below grade to the north.

42 Further Description of Important Features The main facade of this residence faces south. An attached garage projects at the east end of the residence, with a steep hip roof that echos the roof of the main portion of the house. The arched entrance is set within a gabled projection. Brick window sills provide a contrast with the stone veneer of the south facade.

43 History and Significance The earliest known residnet of this house (1928) was John B. Nicholson, associated with the Larabee Flour Mill Company. The house was constructed at a cost of \$15,000.

44. Description of Environment and Outbuildings The house occupies a hillside lot. Other residences are to the north, south, east and west.

*2 Further Description of Important Features The main facade of this house faces south. The first floor walls are constructed of stone and the entrance is centrally located. A single story porch extends to the west. In 1954 a two-car, attached garage was added to the east end of the house.

43. History and Significance This was originally the home of Nelson T. Haynes, manager of the Globe Warehouse Company.

44 Description of Environment and Outbuildings Residences are east, west and north of this house. The house is sited on a hillside lot and below grade to the north is another residence.

- 42 Further Description of Important Features This residence faces south. The entrance is set within a gabled projection. The first floor is brick, while vertical board and batten siding is used for the second floor. The roof peaks in a steep gable over the west end, and is at crossaxis with the primary roof slope. The roofing material is slate, which addes another texture to the combination of construction materials.
- 43. History and Significance The earliest known resident of this house (1927) was Thomas G. Payne, Secretary-Treasurer of the Fred Harvey Company.
- 44 Description of Environment and Outbuildings This building sits on a corner, hilside lot. dences are east, west, north and south.

42 Further Description of Important Features The main facade of this duplex faces north. The entrance is set in a rounded arch. At the east end of the main facade, second floor, is an oriel window. Half timbering is used extensively on the second floor. A prominent exterior chimney of the north facade is brick with a stone base and stone accents.

- 43 History and Significance One in a series of duplexes constructed by J. Hempfling. The original residents were William A. Ross, manager of the W.A. Ross Construction Company and Otis B. Volz, manager of the Diamond Rubber Company.
- 44 Description of Environment and Outbuildings Ward Parkway and Brush Creek are to the north. To the south, above grade, is a residence. A similar duplex is to the west. A traffic island is to the east.

42 Further Description of Important Features This duplex is characterized by a number of projections which terminate in steep gables; a stuccoed exterior; and the use of half-timbering in the gable surfaces, all typical elements of the Tudor Revival style. The design is highly successful in its appearance as a single family residence, when it actually houses two independent living units. A 2nd floor porch was enclosed in 1944 and in 1948 an addition extended the residence to the west.

- 43 History and Significance One in a series of duplexes constructed by J. Hempfling. One of the first tenants was Nick Doffling, President of a land company.
- 44. Description of Environment and Outbuildings Brush Creek and Ward Parkway are north of this duplex. To the east and west are other duplexes.

42 Further Description of Important Features This duplex features a number of stylistic elements that are typical of the Tudor Revival, and which include: a stuccoed exterior; half-timbering in the gable surfaces; multiple roof projections which are either steeply pitched gables or jerkinheaded gables; and a prominent chimney. The design of the duplex suggests a one family residence rather than two independent living units.

43 History and Significance One in a series of duplexes constructed by J. Hempfling. The first occupants of the duplex were J.J. Hempfling, a contractor and Albert C. Sargent, a sales manager.

44. Description of Environment and Outbuildings Brush Creek and Ward Parkway are north of this duplex. To the east and west are other duplexes.

42 Further Description of Important Features The gabled entrance bay projects at the east end of the north facade. The brick walls of the entrance bay provide a contrast to the stuccoed walls of the remainder of the house. Half-timbering decorates the gable wall surface above the entrance door.

43 History and Significance One in a row of three houses built by Henry R. Ostrum. The residences are sited around the semicircular perimeter of a cul-de-sac.

14 Description of Environment and Outbuildings The backyards of adjacent residences are north, east and south. To the west is another residence.

42 Further Description of Important Features The residence features stylistic characteristics that identify it as Tudor Revival. These include: stoccoed walls, multiple roof projections; and halftimbering on the gable and wall surfaces. The entrance is centrally placed, and a strict sym metry is established by the flanking bays.

43 History and Significance The earliest known resident of this house (1927) was a land dealer, Albert R. Kilburn. One of four residences in a row constructed for the Fisher Realty Company.

14. Description of Environment and Outbuildings Brush Creek and Ward Parkway are north of this house. the east is a cul-de-sac drive, Twin Oaks Circle. Other residences are to the south and west.

- 42 Further Description of Important Features This residence faces north and is characterized by regularity in its massing and window openings. The entrance is centrally located and features a projecting triangular pedimented portico. A wooden molding over the side bays on the first story mirror this triangular pediment.
- 43 History and Significance The earliest known resident of this house (1927) was Fitzhugh Funsten, an electrical supply dealer. One of four residences in a row constructed for the Fisher Realty Company. William Koch is attributed as architect because of the similarity in style and date between this house and the adjacent house to the east, also built by the Fisher Realty Company.
- 14 Description of Environment and Outbuildings Ward Parkway and Brush Creek are north of this house. To the south, east amd west are other residences.
