

Route 66 State Park

INNER LOOP TRAIL

Inner Loop Trail provides access to many features of this park. Part of the trail makes use of a road and is shared with two-way traffic. The majority of the trail is the designated outer shoulders of a one-way loop road. Following the trail counter clockwise from the trailhead, a small wetland on the right is followed by the Town Mound, where the physical remains of the structures of Times Beach are buried. The trail also passes the entrance to the picnic and shelter areas with a playground for a nice family picnic and play time. Continuing on, the trail passes through several wooded areas and by several small wetland areas, open areas and small ponds before heading toward the Burlington Northern Railroad tracks and intersecting with Outer Loop Trail. Inner Loop Trail goes along the tracks to the trail connection to Kircher Park and Flat Creek Trail in Eureka. The trail parallels Interstate 44 before finishing the loop back at the main parking area. White connectors 1 and 2 allow access to Outer Loop Trail.

Distance: 2.0 Miles

Elevation profile is not available

Uses:

Hiking

Hardened Surface Biking

Equestrian

Accessible

You may experience:

12) Road/highway crossing

Blazes:

Red

White 1

White 2

Class: Loop

Surface Type: Natural, Paved/Concrete

Trail Rating: Easy

Estimated Hiking Time: 58 Minutes

Trailhead & GPS Location:

38.50416, -90.59863

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section

A **loop** trail is one that will return you to the trailhead. **Multi-loop** trails offer two or more separate loops, ex. a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A **trail system** is a series of interconnected trails that allow you to choose your own route.

A **Multi-section** trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

- 1 Slippery conditions and/or downed vegetation
- 2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.
- 3 Rocks, roots and/or downed vegetation on trail
- 4 Low-hanging vegetation
- 5 Physically challenging obstacles
- 6 Wood or stone steps
- 7 Steep grades and inclines over 10%
- 8 Bluffs or drop-offs next to trail
- 9 Bridges and/or structural crossings
- 10 Water/stream crossings without bridges
- 11 Occasional water over trail
- 12 Road/Highway crossing
- 13 Emergency response signs
- 14 Narrow passages
- 15 Raised or protruding obstacles
- 16 Electric fence crossings
- 17 Bison/elk
- 18 Rapidly changing weather conditions
- 19 Motorized boat traffic
- 20 Unexpected waves
- 21 Changing water levels
- 22 Surface or submerged objects

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.

TRAIL USE

-  Hiking Trail
-  Backpacking Trail
-  Mountain Biking Trail
-  Equestrian Trail
-  Accessible
-  Hardened-Surface Bicycling Trail
-  Paddling Trail
-  Off-Road Vehicle (ORV) Trail
-  Motorized Boating Trail
-  Wagon Suitable Trail
-  Interpretive Trail
-  Fitness Trail
-  Interpretive Water Trail
-  Wildlife Viewing Trail
