105 E SOUTH
E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This two-story house has a moderate-to-steep pitch side-gable roof with wide eaves. The primary facade has three bays. From left to right, the bays are defined on the first story by paired window, the main entrance, and another paired window. Most of the windows are replacement one-over-one light, double-hung sash units, however a few original nine-over-one light wood sash units remain. A shallow-pitch gable-front roof porch shelters the two east end bays. The porch features square brick supports and a solid brick balustrade wall that continues around an open patio section at the west end bays. Additional historic architectural features include the brick chimney on the roof ridge, the stone trim details (window sills, porch details), and the exposed rough-cut stone foundation.
T. Significance
2Y. Description of Environment and Outbuildings
History
This house appears on the 1945 Sanborn Map, but is not on the 1914 map. The parcel is part of Grover's 2nd Addition.

E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This large house has a steep pitch, gable-front roof with wide eaves. Additional roof features include the decorative knee brackets and a gable dormer on the west roof slope. The primary facade has three bays. From left to right, the bays are defined on the second story by three single windows. The windows are five-over-one light, wood sash units. A shallow pitch gable-front roof porch shelters the full-width of the first story. The porch features tapered square supports that rest on stone piers. The porch has been enclosed with screening. Additional historic features include the brick wall corner trim, the exposed rafter tails, and the original wood trim around windows, doors, and on the porch roof.
T. Significance
2Y. Description of Environment and Outbuildings
A historic automobile garage is at the northwest corner of the lot. The gable-front building has a single vehicular bay, wood siding, exposed rafter tails, and small square windows in the side elevations.

D. Address / Location
211 W SOUTH
E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This house has a moderate pitch gable-front roof with moderate eaves. The primary facade has three bays. From left to right, the bays are defined by a pair of windows, the main entrance, and a pair of windows. The windows are three-over-one light, double-hung wood sash units. A gable roof porch projects over the two west end bays and features brick support posts and a non-historic wood balustrade. Additional historic architectural features include the exterior brick chimney on the east elevation and the exposed rafter tails under the eaves.
T. Significance
2Y. Description of Environment and Outbuildings
History
This house does not appear on the 1914 Sanborn Fire Insurance map, but shows up by the 1945 edition. The parcel is part of the Holden's 3rd Addition.

2X. Further Description
This house has a steep pitch cross-gable roof with tight eaves. The primary facade has three bays. From left to right, the bays are defined on the first story by two single windows and the main entrance. The windows are one-over-one light, double-hung wood sash units. The first-story facade bays are recessed under the main roof, forming a porch supported by painted brick supports. A large arched opening for an upper-story porch is in the front-facing gable and is enclosed with a glass curtain wall. A brick chimney is on the roof ridge.
T. Significance
2Y. Description of Environment and Outbuildings
A gable-front, single-car garage located at the southeast corner of the lot has wood clapboard siding and wide eaves with exposed rafter tails.
History
The 1983 Survey form states this was the house of W.A. Stephens, a presiding judge of the Johnson County courts. The Survey form calls it the W.A. Stephens-Charlie Sharp House. This house appears on the 1914 Sanborn Fire Insurance map. The parcel is part of the Davis Addition.

213 W SOUTH
E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This house has a moderate-to-steep pitch side-gable roof with wide eaves. The primary facade has three bays. From left to right, the bays are defined by a single window, the main entrance, and a single window. The windows are one-overone light, double-hung wood sash units. The front roof slope continues forward to form a full-width porch with rough cut stone supports and stone balustrade. A large shed dormer is on the front roof slope. The entrance has full sidelights. The gable walls and dormer walls have stucco cladding.
T. Significance

2Y. Description of Environment and Outbuildings
History
This have does not assess the 4044 Carbon Fire larger and the 4045 divisor Theorem 1
This house does not appear on the 1914 Sanborn Fire Insurance map, but shows up by the 1945 edition. The parcel is part of the Holden's 3rd Addition.

2X. Further Description
This house has a moderate-to-steep pitch side-gable roof with wide eaves. The primary facade has three bays. From left to right, the bays are defined by a band of three windows, the main entrance, and a band of three windows. The windows are three-over-one light, double-hung wood sash units. The front roof slope continues forward to form a full-width porch that features square wood supports and a solid balustrade wall. A large gable dormer is on the front roof slope. The entrance appears to have originally had full sidelights that are now plywood panels. A historic shed roof addition on the west elevation contains a single-car garage with hinged wood doors.

2X. Further Description
This American Four Square house has a moderate-to-steep roof with wide eaves. The primary facade has three bays. From left to right, the bays are defined on the first story by a band of three windows, the main entrance, and a single window. The windows are nine-over-one light, double-hung wood sash units. A hip roof porch shelters the facade bays and features square support posts that extend to the ground and a tall matchstick balustrade that also extends to the ground. Additional historic architectural features include the combination of wood shingle and wood clapboard siding, the brick chimney on the west roof slope, the hipped dormer on the front roof slope, and the original wood trim details (wall corner trim, window and door casing trim, etc.).

222 W SOUTH
E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This house has a moderate pitch cross-gable roof with moderate eaves. The primary facade has two bays. From left to right, the bays are defined by a single window and the main entrance. The windows are one-over-one light, double-hung wood sash units and non-historic vinyl replacement sash units with faux muntins. A shed roof porch shelters the entrance bay at the west end and features a non-historic square wood support post and a historic turned post. There is no balustrade. Additional historic architectural features include the partially exposed stone foundation and the decorative fish scale shingles on the gable walls.
T. Significance
2Y. Description of Environment and Outbuildings
History
This house appears on the 1945 Sanborn Fire Insurance map, the earliest to show this part of Warrensburg. The parcel is part of Davis' Addition.

2X. Further Description
This house has a steep pitch gable-front roof with moderate eaves. The primary facade has four bays. From left to right, the bays are defined by a single car garage addition, a single window, the main entrance, and a single window. The windows are the historic one-over-one light, double-hung wood sash units. A shed roof porch shelters the two east end bays and features square wood support posts and a matchstick balustrade. Additional historic architectural features include the wood shingle cladding and the shed dormers on each roof slope.
T. Significance
2Y. Description of Environment and Outbuildings
An ancillary building located at the rear of the lot has stucco wall covering and a complex roof that includes perpendicular gable sections of differing pitches and a shed roof section. It appears to function as a secondary residence.
History
This house appears on the 1945 Sanborn Map. The parcel is part of John Houx's Addition.

2X. Further Description
This house has a shallow pitch cross-hip roof with moderate-to-wide eaves. The primary facade has two bays. From left to right, the bays are defined by a pair of windows and a single window. The windows are one-over-one light, double-hung vinyl sash units. A hip roof porch shelters the entrance bay and features early twentieth century square wood supports; there is no balustrade. Historic architectural elements include the wood clapboard siding, the entrance that leads into the east elevation of the west end projection, and the stone foundation that is partially exposed. A twin building is next-door at 307.

2X. Further Description
This house has a moderate pitch cross-gable roof with moderate eaves. The front-facing gable projection is at the center of the primary facade. The primary facade has three bays. From left to right, the bays are defined by a single window, the main entrance, and a single window. The windows are one-over-one light, double-hung wood sash units. The entrance is unsheltered and has a concrete floor and an iron railing. A brick chimney is on the east roof slope. Additional historic features include the original wood window casing trim and partially exposed stone foundation.
T. Significance
1. Olymnounce
2Y. Description of Environment and Outbuildings A historic hip roof garage at the southwest corner of the lot has two, single-car vehicular bays on the primary facade that contain wood pivot overhead doors.
History
This house appears on the 1945 Sanborn Map with its original porch intact. The auto garage is present on this map, as well. The parcel is part of Solomon's South Addition.

D. Address / Location
410 W SOUTH
E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This house has a moderate pitch cross-gable roof with moderate eaves. The front-facing gable is at the west end. The primary facade has five bays. From left to right, the bays are defined by a single window, the main entrance, and three single windows. The windows are tall, narrow two-over-two light, double-hung wood sash units with decorative shutters. A shed roof porch shelters the two east end bays and features square wood support post and a decorative iron balustrade.
T. Significance
2Y. Description of Environment and Outbuildings
A gable-front garage located at the southwest corner of the lot has a two-car vehicular bay in the primary facade (with center post support) and vertical wood siding.
History
This building appears on the 1945 Sanborn Insurance Map. The parcel is part of Solomon's South Addition.

2X. Further Description
This house has a very shallow pitch side-gable roof with wide eaves. The house features three levels, with the center-bay entrance at a mid-level between the upper and lower levels. The primary facade has five bays. From left to right, the bays are defined on the upper level by two single windows, the main entrance, and two single windows. The windows are six-over-six light, double-hung wood sash units with decorative shutters. Two, single-car vehicular bays are located at the east end of the lower level. A decorative (non-functional) porch spans the full width of the upper level. The porch features turned post supports and balustrade. A broad exterior brick chimney is on the west elevation.

2X. Further Description
This house has a moderate pitch cross-gable roof with moderate eaves. The front-facing gable is at the east end. The primary facade has five bays. From left to right, the bays are defined by a pair of windows, the main entrance, a pair of windows, and two single windows. The windows vary and are either tall, narrow two-over-two light or they are one-over-one light, double-hung wood sash units. The front roof slope continues forward to form the porch that is enclosed (comprised of the three west end bays). Additional historic architectural elements include the wood clapboard siding and the wood trim elements (wall corner trim, fascia board trim under eaves, and window casing trim).

E. City Warrensburg, MO B. County 101 Johnson
2X. Further Description
This house has a moderate pitch roof with wide eaves. The primary facade has five bays. From left to right, the bays a defined by four single windows and the main entrance. The entrance bay is recessed under the main roof, forming a porch. The porch features decorative iron supports and a low brick balustrade wall. The windows are horizontally divide two-over-two light wood sash units.
T. Significance
1. Significance
2Y. Description of Environment and Outbuildings
A side-gable building at the rear of the lot appears to have originally been a garage. The garage entrances have been filled in. The primary façade has three bays – a double-leaf full-light entrance at the west end, a single window, and a pedestrian entrance with plywood infill at the east end.
listory
he stone foundation suggests an earlier house stood at this location. The available Sanborn Fire Insurance maps do not show this area of Warrensburg.

2X. Further Description
This church has a steep pitch cross-gable roof with wide eaves. The building has two primary facades – north and west. The north elevation has four bays formed by three single windows; the west elevation has four bays formed by three single windows and the main entrance door. The steeple is located at the intersection of the two cross-gable wings and features a Mansard roof with lower blind cross-gables on each roof slope. The windows are tall, narrow two-over-two light Gothic arched wood sash units. A shed roof porch shelters the main entrance and does not appear to be original to the design. A non-historic unpainted wood ramp leads from the entrance across the north half of the west elevation and across the west half of the north elevation. Additional key historic architectural features include the brick chimney on the west roof slope, the ocular windows in each upper gable wall, the open eaves with exposed rafters, and the exposed stone foundation. Also of note are the slightly contrasting brick units that function as trim details such as, corner quoins, window surrounds, and a belt course at the window sill level.
T. Significance
2Y. Description of Environment and Outbuildings
History
The Warren Street M.E. Church is reportedly one of the most complex 19th century religious buildings constructed for an African-American congregation in the region. The building is significant for its associations with Warrensburg African-American community. This building appears on the 1907, 1914 and 1945 Sanborn maps. The parcel is part of Holden's 3rd Addition. The building was listed in the National Register of Historic Places in the 1990s.

2X. Further Description
This house has a steep pitch cross-gable roof with moderate eaves. The front-facing gable is in the center of the primary facade. The primary facade has three bays, defined by single windows. The windows are one-over-one light, double-hung wood sash units covered by exterior storm window units. The front roof slope extends forward over the left end bay to shelter the main entrance that leads into the side elevation of the gable-front projection. Additional historic architectural features include the partially exposed stone foundation and the multi-light half-round window in the gable peak
T. Significance
1. Significance
2Y. Description of Environment and Outbuildings
A stone retaining wall that continues in front of the neighboring houses separates the front yard from the sidewalk. A gable roof garage is at the rear of the lot. The garage has concrete block walls and small square windows on the side elevations.
History
This house appears on both the 1914 and 1945 Sanborn maps. This lot is part of N.B. Holden's 1st Addition.

2X. Further Description
This house has a moderate pitch roof with wide eaves. The primary facade has two bays. From left to right, the bays are defined on the first story by the main entrance and a single window. The windows are twelve-over-one light wood sash windows with decorative shutters. A shed roof porch spans the first story and features heavy brick support posts. Additional historic architectural features include gable domners on each roof slope, the pair of small square windows with diamond pattern muntins in the center bay of the second story, and the eaves returns on the dormer gables.
T. Significance
2Y. Description of Environment and Outbuildings
A stone retaining wall that continues in front of the neighboring houses separates the front yard from the sidewalk. A mid-twentieth century gable-front garage is lat the southeast corner of the lot and accessed by a paved driveway from the street. The garage has a shallow pitch roof with tight eaves and two facade bays – a single-car vehicular bay and a small window. Board-and-batten siding covers the walls.
History
This house appears on both the 1914 and 1945 Sanborn maps. The 1945 Sanborn map shows the adjacent garage
attached to the main building. This lot is part of N.B. Holden's 1st Addition.

2X. Further Description
Reportedly the oldest house standing in Warrensburg, this house consists of a two-story block with a one-story wing on the west elevation. It has a moderate pitch gabled roof aligned perpendicular to the street (aligned east-west). The east elevation has a single bay that contains an entrance door. The north elevation has two bays in the two-story block and an additional bay in the one-story wing. The windows are eight- and six-over-one light, double-hung wood sash windows. The shadow of a previous porch is visible on the south elevation, where two additional pedestrian entrances are present. The loss of the original veranda and exterior stairway hinder this building's integrity. Further study and interior investigation would be required to determine if the house might still be eligible for listing in the National Register of Historic Places.
T. Significance
1. Organisation
2Y. Description of Environment and Outbuildings
Located in "Old Town" Warrensburg.
History
Reportedly the oldest remaining house in Warrensburg. The 1983 Survey form reports that the house was originally a simple 3-room plan and a kitchen and bedroom had been added to the SW corner. At the time, two simple mantle fireplaces were intact within. Available Sanborn Fire Insurance maps do not cover this area of Warrensburg.

2X. Further Description
This mid-twentieth century house has a shallow pitch roof with wide eaves. The primary facade has four bays. From left to right, the bays are defined by two pairs of windows, the main entrance, and a tripartite picture window. The windows are horizontally divided two-over-two light, double-hung wood sash units with decorative shutters. The facade wall projects forward slightly at the two left end bays. A broad brick chimney is on the right side elevation. The entrance is recessed slightly and has a decorative iron post support.
