Missouri SCORP Residents Survey

2013-2017 Statewide Comprehensive Outdoor Recreation Plan

Executive Summary

This study of outdoor recreation trends and issues in the state of Missouri was commissioned by the Missouri Department of Natural Resources - Division of State Parks to fulfill the federal requirements for the 2012-2017 Statewide Comprehensive Outdoor Recreation Plan (SCORP). The SCORP is a five-year plan, for the years of 2013 through 2017, for meeting the recreational needs of the citizens of the State of Missouri.

The objectives of this study, conducted through a statewide telephone survey of Missouri residents, were to identify and assess and quantify outdoor recreation activity and facility availability, demand and popularity; activity levels, facility usage, and whether they are set to increase or decrease in the next five years.

This quantitative research study aims to:

- Collect pertinent information pertaining to outdoor recreation in the State of Missouri
- Provide recommendations for further action based on research findings

The key findings and recommendations of this study are:

Familiarity with outdoor recreation:

• 35.4% of Missouri residents are very familiar with outdoor recreation in their area.

General activity levels and distance travelled to participate in outdoor recreation:

- During the past year, 37.5% of Missouri residents typically traveled zero to four miles to participate in outdoor recreation during the week.
- 18.5% of Missouri residents traveled 100 miles or more to participate in outdoor recreation during the weekend
- Urban Missouri residents travel less distance to participate in outdoor recreation compared to rural Missouri residents
- 22.0% of Missouri residents participate in outdoor recreation between one and two hours during the week.
- 37.7% of Missouri residents participate in outdoor recreation at least five to eight hours during the week.
- 34.2% of Missouri residents live less than one mile from an outdoor recreation facility.
- 60.8% of Missouri residents live within two miles of an outdoor recreation facility.
- 49.4% of Missouri residents perceive their household's overall outdoor recreation usage increasing at least a little more than the next five years.
- 21.6% of Missouri residents perceive their household's overall outdoor recreation usage increasing or increasing a lot in the next five years.
- 36.3% of Missouri residents participated in some sort of outdoor recreation activity within the past week.
- 56.0% of Missouri residents participated in some sort of outdoor recreation activity within the past month.
- The main reasons why Missouri residents don't participate in outdoor recreation are health concerns, disabilities, lack of interest, cost/economic concerns, and age concerns.

Outdoor recreation facility usage:

- Urban Missouri residents use walkable streets or sidewalks and local parks more frequently than rural Missouri residents.
- Rural Missouri residents use fishing sites, lakes and rivers more frequently than urban Missouri residents.
- More than 70% of Missouri residents have used a local park or a walkable street or sidewalk in their neighborhood in the past year.
- More than 60% of Missouri residents have visited a historic/education site in the past year.
- More than 50% of Missouri residents have used a lake, garden, picnic area or state park in the past year.
 - More than 20% of garden users indicated there were too few or way too few gardens when asked about local supply.
- More than 40% of Missouri residents have used a fishing site, trail, nature area/park, rivers, wildlife areas, national or state forests, boating and water sport access sites or playgrounds in the past year.
 - o More than 20% of trail users indicated there were too few or way too few when asked about supply.
- More than 30% of Missouri residents have used an outdoor swimming pool, a national park or monument or a camping site in the past year.
 - o More than 20% of outdoor swimming pool users and more than 20% of camping site users indicated there were too few or way too few when asked about supply.
- Most requested facility types were trails (foot and bike) and walkable sidewalks and sidewalks.

Participation in outdoor recreation activities:

- Frequently used activities that are expected to increase in the next five years include fishing, camping in a campground, bicycling, baseball, golf, running/jogging, and soccer.
- Urban Missouri residents participate in more walking, bicycling, baseball and golf activities compared to rural Missouri residents.
- Rural Missouri residents participate in more fishing, boating, sailing, canoeing and kayaking, target shooting, hunting, and ATV/off road riding compared to urban Missouri residents.
- More than 80% of Missouri residents participated in walking or a family gathering in the past year.
- More than 70% of Missouri residents participated in driving for sightseeing or gardening in the past year.
- More than 60% of Missouri residents participated in picnicking, outdoor swimming or wildlife observation/birding in the past year.
- More than 50% of Missouri residents participated in fishing or boating, sailing, canoeing and kayaking in the
 past year.
 - More than 20% of fishing participants indicated their usage is either increasing or increasing a lot.
- More than 40% of Missouri residents participated in playgrounds, camping in a campground, bicycling or dog walking in the past year.
 - More than 20% of camping and bicycling participants indicated their usage is either increasing or increasing a lot.
- More than 30% of Missouri residents hiking, wildlife/outdoor photography, target shooting or baseball in the past year.
- Most requested activities were walking/hiking activities and youth related programs.

Attitudes:

- More than 75% of Missouri residents agree or strongly agree that outdoor recreation benefits Missouri residents and more than 25% of Missouri residents strongly agree with that statement.
- More than 75% of Missouri residents agree or strongly agree that outdoor recreation is important to them and more than 25% of Missouri residents strongly agree with that statement.
- More than 60% of Missouri residents agree that Missouri is well known for outdoor recreation.
- More than 50% of Missouri residents agree that funding outdoor recreation in Missouri is a high priority.
- More than 50% of Missouri residents agree that trails are important to their household.

Satisfaction - Facilities:

- 40.5% of Missouri residents are very satisfied overall with outdoor recreation facilities in Missouri.
- 38% of Missouri residents are very satisfied overall with the distance to local outdoor recreation facilities.
- 37.7% of Missouri residents are very satisfied with travel time and congestion to local outdoor recreation facilities
- 35.7% of Missouri residents are very satisfied overall with the professionalism of local outdoor recreation employees.
- 36.3% of Missouri residents are very satisfied with outdoor recreation facilities in their local area.
- 35.2% of Missouri residents are very satisfied overall with the safety of local outdoor recreation facilities
- 35.1% of Missouri residents are very satisfied with the availability of local outdoor recreation facilities
- 35.0% of Missouri residents are very satisfied with the quality of local outdoor recreation facilities.
- 32.5% of Missouri residents are very satisfied with the cleanliness of local outdoor recreation facilities.
- 31.2% of Missouri residents are very satisfied with the number of local outdoor recreation facilities.
 - Performing below average and scored high on relative importance
- 28.1% of Missouri residents are very satisfied with the variety of local outdoor recreation facilities.
 - Performing below average and scored high on relative importance
- 16.0% of Missouri residents are very satisfied overall with pet/dog accommodations at facilities.

Satisfaction - Activities:

- 44.9% of Missouri residents are very satisfied overall with outdoor recreation activities in Missouri.
- 37.5% of Missouri residents are very satisfied with outdoor recreation activities in their local area.
- 37.0% of Missouri residents are very satisfied with the availability of local outdoor recreation activities.
- 36.0% of Missouri residents are very satisfied with the accessibility of outdoor recreation activity information.
- 33.3% of Missouri residents are very satisfied with the variety of local outdoor recreation activities.
 - Variety of local outdoor recreation activities is performing below average and scored high on relative importance.
- 32.6% of Missouri residents are very satisfied with the quality of local outdoor recreation activities.
- 23.2% of Missouri residents are very satisfied with community participation in local outdoor recreation activities.
- 21.9% of Missouri residents are very satisfied with quality of organized/supervised recreation programs.
- 21.4% of Missouri residents are very satisfied with the availability of organized/supervised outdoor recreation programs.
- 18.2% of Missouri residents are very satisfied with their interactions with other outdoor recreation users and groups.

Background and Research Objectives

Background: This study was conducted for the Missouri Department of Natural Resources, Division of State Parks (hereinafter referred to as the state agency), the agency responsible for the management of Missouri's state parks, to fulfill the federal requirements of the 2013-2017 Missouri SCORP.

The SCORP is a five-year plan, for the years of 2013 through 2017, for meeting the recreational needs of the citizens of the State of Missouri. One requirement of the 2013-2017 Missouri SCORP was to develop a survey of Missouri residents in order to identity critical issues of statewide importance, and to identify trends and issues impacting the future of outdoor recreation in the State of Missouri.

The state agency contracted the joint venture team of Synergy Group/Pragmatic Research, Inc./James Pona Associates (hereinafter referred to as Synergy/PRI/JPA) to conduct a telephone study among Missouri residents.

Research Problem: Identify critical issues and trends of statewide importance impacting the future of outdoor recreation in Missouri.

Research Objectives: The objectives of this study were to identify and assess critical issues, priorities and obstacles related to outdoor recreation facilities and activities in the state of Missouri; and to quantify and assess activity and facility availability, usage patterns, demand and popularity; satisfaction with outdoor recreation activities and facilities; and perceptions of outdoor recreation among Missouri residents..

These objectives were addressed through 21 research questions (tested through 15 screening/demographic questions and 25 survey questions) as outlined below:

- Management Problem: How familiar are Missouri residents with outdoor recreation in Missouri?
 - o Research Question 1: How familiar are Missouri residents with outdoor recreation in Missouri?
 - Research Objectives
 - RO1.1 Determine outdoor recreation familiarity among Missouri residents.
- Management Problem: How far do Missouri residents travel to participate in recreation activities and how long do they participate?
 - o Research Question 2: How far do Missouri residents travel to participate in outdoor recreation activities?
 - Research Objectives:
 - RO2.1 Determine how far Missouri residents travel to participate in outdoor recreation during the week (i.e. Monday through Thursday).
 - RO2.2 Determine how far Missouri residents travel to participate in outdoor recreation <u>during the weekend</u> (i.e. Friday through Sunday).
 - Research Question 3: How many hours per week do Missouri residents participate in outdoor recreation?
 - Research Objectives:
 - RO3.1 Determine how many hours Missouri residents participate in outdoor recreation <u>during the week</u> (i.e. Monday through Thursday).
 - RO3.2 Determine how many hours Missouri residents participate in outdoor recreation during the weekend (i.e. Friday through Sunday).
- Management Problem: How available is outdoor recreation in Missouri?
 - **Research Question 4:** How satisfied are Missouri residents with the availability of outdoor recreation activities?

- RO4.1 Determine satisfaction of Missouri residents with the availability of local outdoor recreation activities.
- RO4.2 Determine satisfaction of Missouri residents with availability of organized/supervised outdoor recreation programs.
- Research Question 5: What types of outdoor recreation <u>activities</u> do Missouri residents want to see more of in their local area?
 - RO5.1 Determine what types of outdoor recreation activities Missouri residents want to see more of in their local area.
- Research Question 6: How available are outdoor recreation <u>facilities</u> in Missouri?
 - RO6.1 Determine proximity of Missouri residents to the closest local outdoor recreation facility.
 - RO6.2 Determine availability of outdoor recreation facilities among Missouri residents.
 - RO6.3 Determine supply of local outdoor recreation facilities among Missouri residents.
- **Research Question 7:** How likely are Missouri residents to use currently unavailable <u>facilities</u> if they were made available?
 - RO7.1 Determine the likelihood of Missouri residents to use currently unavailable facilities if they were made available.
- Research Question 8: How satisfied are Missouri residents with the availability of outdoor recreation facilities?
 - RO8.1 Determine satisfaction of Missouri residents with the number of outdoor recreation facilities.
 - RO8.2 Determine satisfaction of Missouri residents with the availability of outdoor recreation facilities.
- **Research Question 9:** What types of outdoor recreation <u>facilities</u> do Missouri residents want to see more of in their local area?
 - RO9.1 Determine what types of outdoor recreation facilities Missouri residents want to see more of in their local area.
- Management Problem: How popular is outdoor recreation among Missouri residents?
 - Research Question 10: How often do Missouri residents participate in outdoor recreation <u>activities</u>?
 - RO10.1 Determine how often Missouri residents participate in outdoor recreation activities.
 - RO10.2 Determine other outdoor recreation activities among Missouri residents.
 - Research Question 11: Are <u>activity</u> levels of various outdoor recreation activities in Missouri increasing, decreasing, or remaining the same among Missouri residents?
 - RO11.1 Determine overall perceived outdoor recreation activity level change among Missouri residents.
 - RO11.2 Determine perceived outdoor recreation activity level changes among Missouri residents in the next five years.

Research Question 12: How often do Missouri residents use outdoor recreation facilities in Missouri?

- RO12.1 Determine how often Missouri residents use out outdoor recreation facilities in Missouri.
- RO12.2 Determine other outdoor recreation facilities being used by Missouri residents.
- Management Problem: Why aren't Missouri residents participating in outdoor recreation activities?
 - o Research Question 13: Why aren't Missouri residents participating in outdoor recreation activities?
 - Research Objectives
 - RO13.1 Determine reasons Missouri residents aren't participating in outdoor recreation activities
- Management Problem: How satisfied are Missouri residents with outdoor recreation in Missouri?
 - o **Research Question 14:** How satisfied are Missouri residents with outdoor recreation <u>activities</u> in Missouri?
 - Research Objectives:
 - RO14.1 Determine overall satisfaction of Missouri residents with outdoor recreation activities in Missouri as a whole.
 - RO14.2 Determine overall satisfaction of Missouri residents with local outdoor recreation activities.
 - **Research Question 15:** How satisfied are Missouri residents with various aspects of outdoor recreation activities in Missouri?
 - Research Objectives:
 - RO15.1 Determine satisfaction of Missouri residents with the *quality* of local outdoor recreation activities.
 - RO15.2 Determine satisfaction of Missouri residents with the *availability* of local outdoor activities (see RO4.1).
 - RO15.3 Determine satisfaction of Missouri residents with accessibility of outdoor recreation activity information.
 - RO15.4 Determine satisfaction of Missouri residents with variety of local outdoor recreation activities.
 - RO15.5 Determine satisfaction of Missouri residents with *community participation* in local outdoor recreation activities.
 - RO15.6 Determine satisfaction of Missouri residents with outdoor *user* and *group interactions*.
 - RO15.7 Determine satisfaction of Missouri residents with the *quality of organized/supervised recreation programs*.
 - RO15.8 Determine satisfaction of Missouri residents with the availability of organized/supervised outdoor recreation programs (see RO4.2)
 - Research Question 16: How satisfied are Missouri residents with outdoor recreation facilities in Missouri?
 - Research Objectives:
 - RO16.1 Determine overall satisfaction of Missouri residents with outdoor recreation facilities in Missouri as a whole.
 - RO16.2 Determine overall satisfaction of Missouri residents with local outdoor recreation facilities.
 - **Research Question 17:** How satisfied are Missouri residents with various aspects of outdoor recreation facilities in Missouri?
 - Research Objectives:

- RO17.1 Determine satisfaction of Missouri residents with the *number* of outdoor recreation facilities (see RO8.1).
- RO17.2 Determine satisfaction of Missouri residents with the *quality* of local outdoor recreation facilities.
- RO17.3 Determine satisfaction of Missouri residents with the *availability* of local outdoor recreation facilities (see RO8.2).
- RO17.4 Determine satisfaction of Missouri residents with the *variety* of local outdoor recreation facilities.
- RO17.5 Determine satisfaction of Missouri residents with the safety of local outdoor recreation facilities.
- RO17.6 Determine satisfaction of Missouri residents with the *cleanliness* of local outdoor recreation facilities.
- RO17.7 Determine satisfaction of Missouri residents with the distance to local outdoor recreation facilities.
- RO17.8 Determine satisfaction of Missouri residents with *travel time and congestion* to local outdoor recreation facilities.
- RO17.9 Determine satisfaction of Missouri residents with pet/dog accommodations of local outdoor recreation facilities.
- RO17.10 Determine satisfaction of Missouri residents with the *professionalism of local* outdoor recreation employees.
- **Research Question 18:** What is the relative importance of various aspects of outdoor recreation in Missouri compared to their performance?
 - RO18.1 Determine relative importance of various aspects of outdoor recreation activities.
 - RO18.2 Determine relative importance of various aspects of outdoor recreation facilities
 - RO18.3 Determine the relative performance of various aspects of outdoor recreation facilities and activities compared to their performance.
- Management Problem: What are some opinions and perceptions of Missouri residents regarding outdoor recreation in Missouri?
 - o Research Question 19: How do Missouri residents perceive outdoor recreation in Missouri?
 - Research Objectives:
 - RO19.1 Determine perceptions of Missouri residents regarding outdoor recreation in Missouri.
 - RO19.2 Determine perceptions of Missouri parents with regard to their children's outdoor recreation activities.
- Management Problem: Are there any critical issues or improvements regarding outdoor recreation in Missouri among Missouri residents?
 - Research Question 20: Are there any crucial issues regarding outdoor recreation in Missouri among Missouri residents?
 - RO20.1 Determine perceived issues regarding outdoor recreation among Missouri residents.
 - Research Question 21: Are there any suggestions from Missouri residents on how to improve outdoor recreation in Missouri?

Methodology

This study was a conclusive, descriptive, and cross-sectional study conducted using a Computer Assisted Telephone (CATI) Survey. Qualified respondents included Missouri residents that participated in outdoor recreation at least once within the past year.

Sampling was divided among two populations, rural and urban, and n=384 completes were collected in each region, providing a 95% +/- 5% confidence interval for both regions. Confidence intervals are obtained by multiplying the standard error of the mean by the z-value for desired confidence level, 1.96 for 95% and 1.645 for 90%, and then adding and subtracting it from the mean score (95% C.I. = \bar{x} +/- 1.96*S.E and 90% C.I. = \bar{x} +/- 1.645*S.E). Random sampling frames were provided by PRI. 16,006 records were included in the total sample (7,718 urban records and 8,288 rural records), which covered 782 cities in Missouri, 905 zip codes, and 111 counties (see Appendix C for breakdowns).

Results were combined and weighed based on the 70%/30% urban/rural population ratio in Missouri. Weighting is performed in order to avoid skewing the analysis towards the overrepresented/smaller population (rural in this case).

Weights are determined by the ratio (70% - i.e. 0.7 - for urban and 30% - i.e. 0.3 - for rural) divided by the proportion of the sample that belongs to each group (50% - i.e. 0.5 – for rural and 50% - i.e. 0.5 – for urban in this case, n=384 for both), leading to the following weighting factors:

- Urban Weight = 0.7/0.5 = 1.4
- Rural Weight = 0.3/0.5 = 0.6

All combined frequency counts and mean scores were weighted based on what sample they came from.

Data Collection Instrument and Procedure

SYNERGY/PRI/JPA assisted the state agency in developing the survey instrument. SYNERGY/PRI/JPA programmed the survey to allow for CATI using Ci3 software. The survey was pre-tested among PRI's interview staff to make sure it was clear, easy to understand, flowed and skipped properly.

Of the 16,006 unique records, a total of n=775 completes were collected, for an overall response rate of 4.8%.

Of the 7,718 urban records, 11,253 dials were made to collect n=391 completed questionnaires (3.47% of dials), for an overall response rate of 5%. Seven records were removed from the urban sample due to incomplete data. Six respondents were terminated for not being residents (0.05% of dials) and 102 potential respondents were terminated due to inadequate participation (s14, 0.91% of dials). Incidence was 21.28%.

Of the 8,288 rural records, 8,667 dials were made to collect n=384 completed questionnaires (4.44% of dials) for an overall response rate of 4.6%. Three respondents were terminated for not being a resident (s2, 0.03% of dials) and 140 potential respondents were terminated for inadequate participation in recreation (s14, 1.62% of dials). Incidence was 21.67%.

Assuming a population size of 5,988,927 (US Census Bureau 2010 population:

http://quickfacts.census.gov/qfd/states/29000.html), and assuming a 70/30 urban/rural split, the urban population in Missouri is roughly 4,192,249 and the rural population of Missouri is roughly 1,796,678, n=384 completes will provide a 95% +/- 5% confidence interval for both urban and rural populations, as well as Missouri as a whole (when weighted).

Fieldwork started on July 8th, 2011, and was finished on August 11th, 2011. 19,920 total telephone dials were made over 689.10 total hours (374.88 hours for urban and 314.22 hours for rural). Interviews lasted approximately 25.18 minutes on average (26.12 minutes/cpl for urban and 24.25 minutes/cpl for rural), and interviewers made an average of 25.86 dials per every complete (29.15 dials/cpl for urban and 22.57 dials/cpl for rural). On average, one interview was completed every 1.12 logon hours (1.03 cpl/hour for urban and 1.21 cpl/hour for rural).

For activity and facility usage (q5 and q13), respondent participation/usage was restricted to the past year. Any respondents who had not participated in an activity or used a facility within the past year were coded as never for those activities and facilities. Respondents who participated at least once per year but not two to three times a month were coded as at least once per year, and respondents who used a facility at least once per year but not every four to six months were coded at least once per year.

Action Standards

Action Standards are benchmarks or threshold levels used to determine when action on a particular issue is recommended, based on the level of responses. Action Standards are applied to the entire sample or to subgroups of the sample that have a minimum of n=96 responses, a response large enough to produce a confidence level of 95% +/-10%. That means a minimum of n=96 are needed from either the overall sample (combined rural vs. rural, n=758, N=~5,988,927), the urban sample (n=368, N=~4,192,249) or the rural sample (n=368, N=~1,796,678) in order to be considered in an Action Standard. The following Action Standards have been established for the research questions in this study:

RQ1: How familiar are Missouri residents with outdoor recreation in Missouri?

Action Standard 1.1 (AS1.1)

• IF familiarity with outdoor recreation mean score is less than 3.5 OR top box score is less than 30% THEN recommend taking action (s13).

RQ4: How satisfied are Missouri residents with the availability of outdoor recreation <u>activities</u>?

Action Standard 4.1 (AS4.1)

• IF satisfaction with availability of local outdoor recreation activities mean score is less than 3.0 OR top box score is less than 30% THEN recommend taking action (q10_2).

Action Standard 4.2 (AS4.2)

• IF satisfaction with availability of organized/supervised outdoor recreation programs mean score is less than 3.5 OR top box score is less than 30% THEN recommend taking action (q10 8).

RQ5: What types of outdoor recreation <u>activities</u> do Missouri residents want to see more of in their local area?

Action Standard 5.1 (AS5.1)

• IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with availability of local outdoor recreation activities OR IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with availability of organized/supervised outdoor recreation programs AND more than 5% mentioned an activity when asked what types of activities they would like to see more of in their area THEN recommend taking action (q10_2, q10_8 and q11).

RQ6: How available are outdoor recreation facilities in Missouri?

Action Standard 6.2 (AS6.2)

• IF more than 5% of respondents do not have a specific type of facility available THEN recommend taking action (q13_1 through q13_34).

Action Standard 6.3 (AS6.3)

• IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples use a facility type at least once a year AND more than 20% indicate supply of a facility type is either too few OR way too few THEN recommend taking action (q13_1 through q13_34 and q14_1 through q14_34).

RQ7: How likely are Missouri residents to use currently unavailable <u>facilities</u> if they were made available?

Action Standard 7.1 (AS7.1)

• IF more than 8.85% (n=96) of respondents in the total sample (n=768) OR more than 17.7% (n=96) of respondents from either the rural or urban samples do not have a facility type available AND likelihood to use the facility if it were available mean score is above 3.5 THEN recommend taking action (q13_1 through q13_34 and q15_1 through q15_34).

RQ8: How satisfied are Missouri residents with the availability of outdoor recreation <u>facilities</u> in Missouri?

Action Standard 8.1 (AS8.1)

• IF satisfaction with the number of local outdoor recreation facilities mean is less than 3.5 OR IF top box score is less than 30% THEN recommend taking action (q21 1).

Action Standard 8.2 (AS8.2)

• IF satisfaction with availability of outdoor recreation facilities mean is less than 3.5 OR top box score is less than 30% THEN recommend taking action (q21_3).

RQ9: What types of outdoor recreation <u>activities</u> do Missouri residents want to see more of in their local area?

Action Standard 9.1 (AS9.1)

• IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with the number of local outdoor facilities OR IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with availability outdoor recreation facilities AND more than 5% mentioned a facility type when asked what types of facilities they would like to see more of in their area THEN recommend taking action (q21_1 and q22).

RQ10: How often do Missouri residents participate in outdoor recreation activities?

Action Standard 10.1 (AS10.1)

IF more than 20% of respondents use a facility at least once per year THEN recommend taking action (q5).

Action Standard 10.2 (AS10.2)

IF more than 5% of respondents mention an unlisted activity type THEN recommend taking action (q7).

RQ11: Are <u>activity</u> levels of various outdoor recreation activities in Missouri increasing, decreasing, or remaining the same among Missouri residents?

Action Standard 11.2 (AS11.2)

• IF more than 8.85% (n=96) of respondents in the total sample (n=768) OR more than 17.7% (n=96) of respondents from either the rural or urban participate in a specific activity in their area at least once per year AND more than 20% indicate their activity is either increasing or increasing a lot THEN recommend taking action (q5_1 through q5_36 and q6_1 through q6_36).

RQ12: How often do Missouri residents use outdoor recreation facilities in Missouri?

Action Standard 12.1 (AS12.1)

• IF more than 20% of respondents use a facility type at least at least once per month THEN recommend taking action (q13 1 through q13 34).

Action Standard 12.2 (AS12.2)

• IF more than 5% of respondents mention an unlisted facility type THEN recommend taking action (q16).

RQ14: How satisfied are Missouri residents with outdoor recreation <u>activities</u> in Missouri?

Action Standard 14.1 (AS14.1)

• IF overall satisfaction with outdoor recreation activities in Missouri mean score is below a 4.0 OR top box score is below 30% THEN recommend taking action (q8).

Action Standard 14.2 (AS14.2)

• IF overall satisfaction with local outdoor activities mean score is below a 4.0 OR top box is below 30% THEN recommend taking action (q9).

RQ15: How satisfied are Missouri residents with various aspects of outdoor recreation <u>activities</u> in Missouri?

Action Standard 15.1 (AS15.1)

• IF satisfaction with quality of local outdoor recreation activities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10 1).

Action Standard 15.2 (AS15.2)

See Action Standard 4.1 (AS4.1, RQ4, RO4.1).

Action Standard 15.3 (AS15.3)

• IF satisfaction with accessibility of outdoor recreation information mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10_3).

Action Standard 15.4 (AS15.4)

• IF satisfaction with variety of local outdoor recreation activities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10_4).

Action Standard 15.5 (AS15.5)

• IF satisfaction with community participation in local outdoor recreation activities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10_5).

Action Standard 15.6 (AS15.6)

• IF satisfaction with user and group interactions mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10_6).

Action Standard 15.7 (AS15.7)

• IF satisfaction with quality of organized/supervised recreation programs mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q10 7).

Action Standard 15.8 (AS15.8)

See Action Standard 4.1 (AS4.2, RO4.2, RO4.2).

RQ16: How satisfied are Missouri residents with outdoor recreation <u>facilities</u> in Missouri?

Action Standard 16.1 (AS16.1)

• IF overall satisfaction with outdoor recreation facilities in Missouri mean score is below a 4.0 OR top box score is below 30% THEN recommend taking action (q19).

Action Standard 16.2 (AS16.2)

• IF overall satisfaction with local outdoor facilities mean score is below a 4.0 OR top box is below 30% THEN recommend taking action (q20).

RQ17: How satisfied are Missouri residents with aspects of outdoor recreation facilities in Missouri?

Action Standard 17.1 (AS17.1)

See Action Standard 8.1 (AS8.1, RQ8, RO8.1)

Action Standard 17.2 (AS17.2)

• IF satisfaction with quality of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_2).

Action Standard 17.3 (AS17.3)

• See Action Standard 8.3 (AS8.3, RQ8, RO8.3)

Action Standard 17.4 (AS17.4)

• IF satisfaction with variety of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_4).

Action Standard 17.5 (AS17.5)

• IF satisfaction with safety of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_5).

Action Standard 17.6 (AS17.6)

• IF satisfaction with cleanliness of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_6).

Action Standard 17.7 (AS17.7)

• IF satisfaction with distance to local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21 7).

Action Standard 17.8 (AS17.8)

• IF satisfaction with travel time and congestion to local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_8).

Action Standard 17.9 (AS17.9)

• IF satisfaction with pet/dog accommodations of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_9).

Action Standard 17.10 (AS17.10)

• IF satisfaction with professionalism of local outdoor recreation employees mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_10).

RQ18: What is the relative importance of various aspects of outdoor recreation in Missouri compared to their performance?

Action Standard 18.3.1 (AS18.1)

• IF relative importance score is ABOVE the 50th percentile AND satisfaction mean score is ABOVE the 50th percentile THEN maintain performance and maintain emphasis (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

Action Standard 18.3.2 (AS18.2)

• IF relative importance score is ABOVE the 50th percentile AND satisfaction mean score is BELOW the 50th percentile THEN emphasize increasing performance (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

Action Standard 18.3.3 (AS18.3)

• IF relative importance score is BELOW the 50th percentile AND satisfaction mean score is ABOVE the 50th percentile THEN deemphasize and shift resources to elements determined by AS18.1 (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

Action Standard 18.3.4 (AS18.4)

• IF relative importance score is BELOW the 50th percentile AND satisfaction mean score is BELOW the 50th percentile THEN take action but deemphasize (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

RQ20: Are there any crucial issues regarding outdoor recreation in Missouri among Missouri residents?

Action Standard 20.1 (AS20.1)

• IF more than 5% of respondents mention a perceived issue THEN take action (q24).

RQ21: Are there any suggestions or improvements from Missouri residents on how to improve outdoor recreation in Missouri?

Action Standard 21.1 (AS21.1)

• IF more than 5% of respondents mention a suggestion THEN take action (q25).

Tabulation and Data Analysis Techniques

The following statistical techniques were used to compile this report.

- **Descriptive Statistics:** Includes frequency distributions, means, variances, and other statistical measures. Used to describe the composition of the survey sample and provide preliminary data examinations
- **T-Test**: Statistical test to assess whether the means of two groups are statistically different than one another, e.g. Males vs. Females
- **Crosstab**: Cross-tabulations in order to examine frequencies of observations that belong to specific categories on more than one variable
- **Bivariate Correlation:** Bivariate (two variable) analysis that measures the strength of association between two variables on a scale of -1.0 to 1.0, where 1.0 means the two variables are perfectly correlated. The square of the bivariate correlation is an always positive number between 0 and 1.0 that is used to determine the amount of shared variance among the two variables being correlated.

Detailed Results

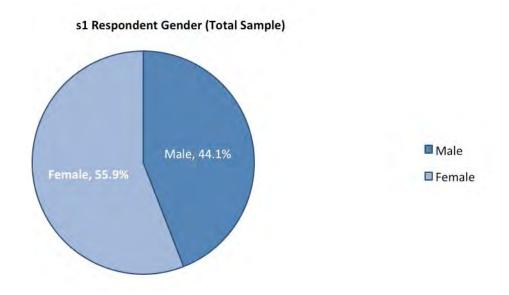

A. Composition of the Sample

Respondent data was collected among rural and urban populations within Missouri. 16,006 records were included in the random sample (7,718 urban records and 8,288 rural records). The sample covered 782 cities in Missouri, 905 zip codes, and 111 counties. 391 urban completes and 384 rural completes were collected. Seven completes were removed from the urban sample due to incomplete data, leaving a total of 768 completes to be used in the analysis. Screener data was collected from all respondents (n=1273), including those who disqualified due to lack of participation (s14, n=242).

Frequency tables for all questions can be found in Appendix B: s1 through s15.

Respondent gender was recorded for all respondents (Chart S.1a and Appendix B: s1).

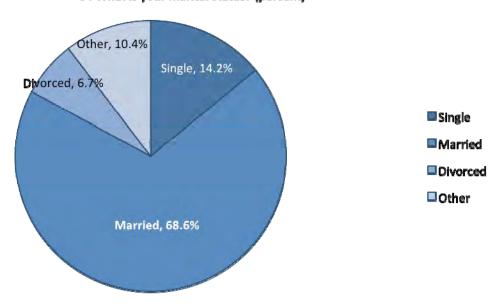

Chart S.1a. Respondent Gender Data

Respondents were asked their marital status (Chart S.1b and Appendix B: s4).

Chart S.1b. Respondent Marital Status

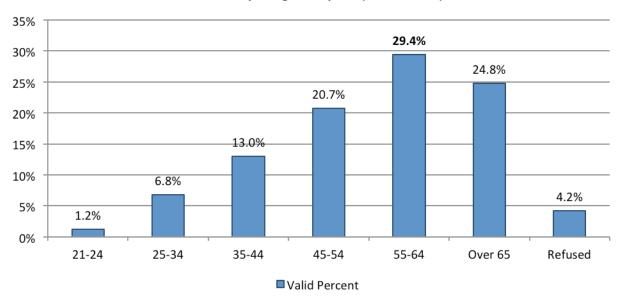

s4 What is your marital status? (percent)

Respondents were asked their age category (Chart S.1c and Appendix B: s5).

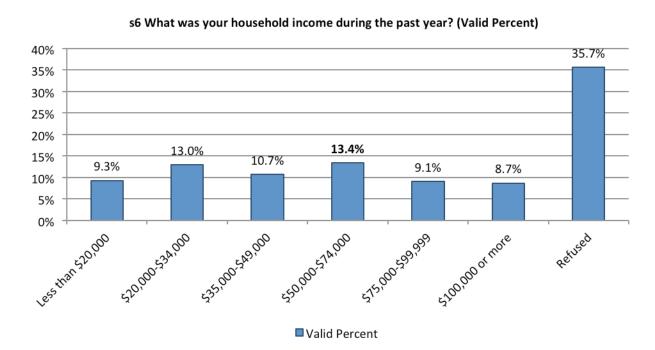

Chart S.1c. Respondent Age Data

s5 What is your age? Are you... (Valid Percent)

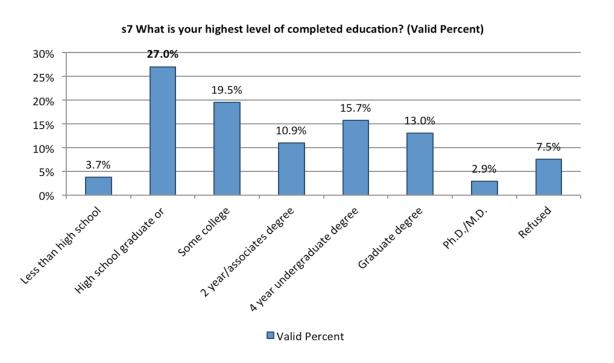

Respondents were asked their household income more than the past year (Chart S.1d and Appendix B: s6).

Chart S.1d. Respondent Income Data

Respondents were asked the highest level of education they've completed (Chart S.1e and Appendix B: s7).

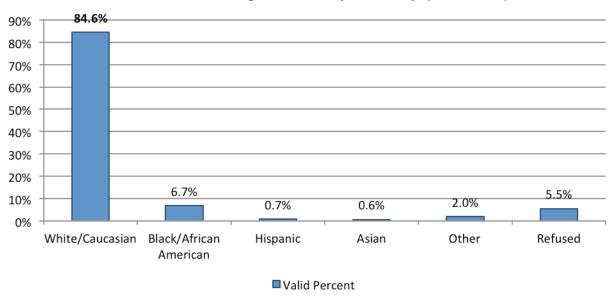

Chart S.1e. Respondent Education Data

Respondents were asked their ethnicity (Chart S.1f and Appendix B: s8).

Chart S.1f. Respondent Ethnicity Data

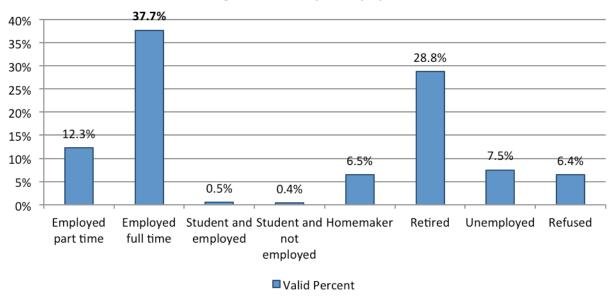

Respondents were asked their employment status (s9, Chart S.1g).

Chart S.1g. Respondent Employment Status

s9 Which of the following best describes your employment status? Valid Percent

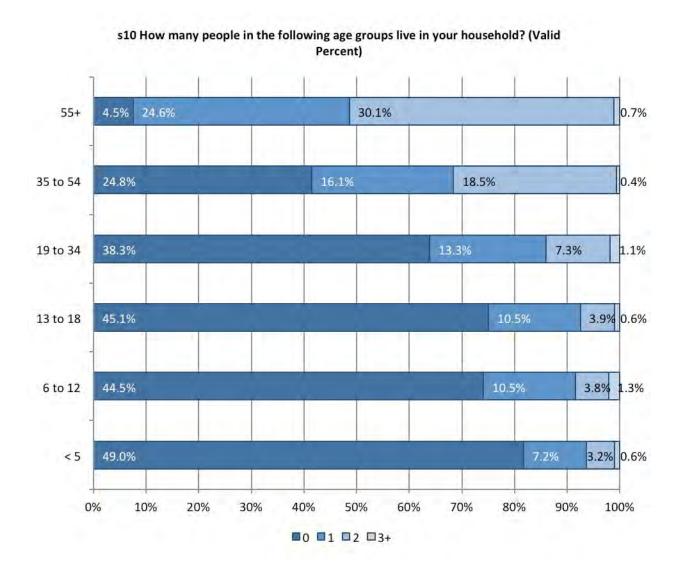

Respondents were asked how many people from different age categories live in their household (Table S.1h, Chart S.1h and Appendix B: s10).

Table S.1h. Descriptive Statistics (urban and rural combined and weighted) s10 How many people in the following age groups live in your household?			
	$N_{\rm w}$	Mean	Std. Dev.
Number of children in household under 5	1126	0.16	0.516
Number of children in household between 6 and 12	1125	0.22	0.589
Number of children in household between 13 and 18	1124	0.21	0.571
Number of adults in household between 19 and 34	1124	0.31	0.652
Number of adults in household between 35 and 54	1124	0.57	1.076
Number of adults in household over 55	1123	0.91	1.521

⁽w) Indicates weighted score

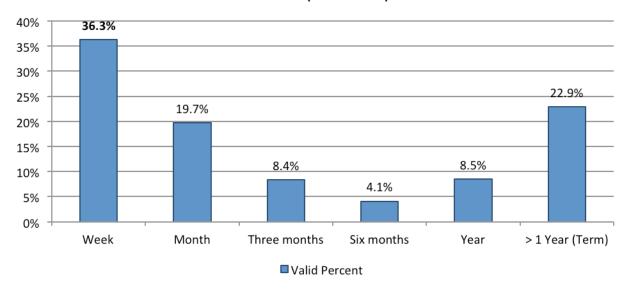

Chart S.1h. Respondent Household Age Data

Respondents were asked the last time they participated in any outdoor recreation activity in Missouri (Chart S.1i).

Chart S.1i. Respondent Outdoor Recreation Activity

s14 When was the last time you participated in any outdoor recreation actitivy in Missouri? (Valid Percent)

B. RESEARCH QUESTIONS (RQ1 - RQ8)

Management Problem

• How familiar are Missouri residents with outdoor recreation in Missouri?

Research Question 1 (RQ1)

• How familiar are Missouri residents with outdoor recreation in Missouri?

Research Objective 1.1 (RO1.1)

Determine outdoor recreation familiarity among Missouri residents.

Respondents were asked how familiar they are with outdoor recreation in their area using a 1 to 5 scale with 1 being "Not at all familiar" and 5 being "Very familiar" (Table RO1.1a, Chart RO1.1a and Appendix B: s13).

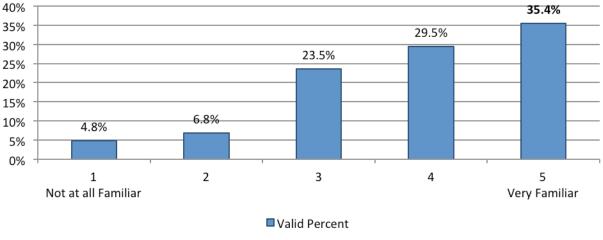

- 35.4% (n_w=272) of Missouri residents are very familiar with outdoor recreation in their area.
- 95% confident that familiarity among Missouri residents with local outdoor recreation is between 3.76 and 3.92 ($\bar{x_w} = 3.84 + /-0.080$).

Table RO1.1a. Group Statistics (urban and rural combined and weighted, urban raw and rural raw) s13 How familiar are you with outdoor recreation in your area?				
	$\textbf{Frequency}_{w}$	Mean_{w}	Std. Error	Std. Dev.
s13 How familiar are you with outdoor recreation in your area?	768	3.84	0.041	1.128

⁽w) Indicates weighted score

Chart RO1.1a. Familiarity with Outdoor Recreation

s13 How familiar are you with outdoor recreation in your area? (Valid Percent)

Action Standard 1.1 (AS1.1)

- IF familiarity with outdoor recreation mean score is less than 3.5 OR top box score is less than 30% THEN recommend taking action (s13).
- × No action recommended.

Management Problem

How far do Missouri residents travel to participate in recreation activities and how long do they participate?

Research Question 2 (RQ2)

How far do Missouri residents travel to participate in outdoor recreation activities?

Research Objective 2.1 (RO2.1)

• Determine how far Missouri residents travel to participate in outdoor recreation <u>during the week</u> (i.e. Monday through Thursday).

Respondents were asked how far they travel to participate in outdoor recreation during the week (Chart RO2.1a and Appendix B: q1).

 37.5% (n_w=282) of Missouri residents traveled zero to four miles to participate in outdoor recreation during the week.

Distance traveled by urban Missouri residents during the week and distance traveled by rural Missouri residents during the week differ significantly.

• 41.3% (n=157) of urban Missouri residents traveled zero to four miles to participate in outdoor recreation compared to 28.2% (n=104) of rural Missouri residents (Chart RO2.2a).

Chart RO2.1a. Distance Traveled for Outdoor Recreation - Weekday

q1 During the past year, how far did you travel to participate in outdoor recreation during the week? (Valid Percent)

Research Objective 2.2 (RO2.2)

• Determine how far Missouri residents travel to participate in outdoor recreation <u>during the weekend</u> (i.e. Friday through Sunday).

Respondents were asked how far they travel to participate in outdoor recreation during the weekend (Chart RO2.2a and Appendix B: q3).

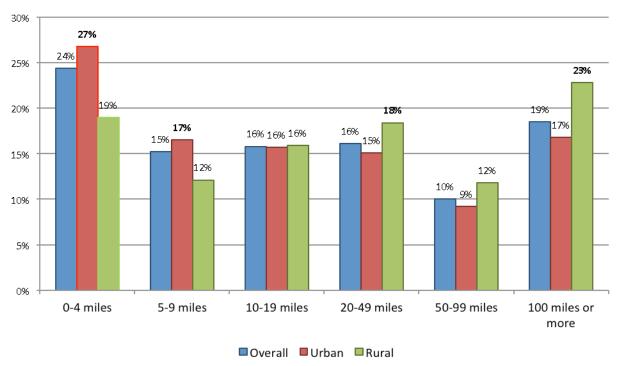

- 24.4% (n_w=180) of Missouri residents traveled zero to four miles to participate in outdoor recreation during the weekend.
- 18.5% (n_w=137) of Missouri residents traveled 100 miles or more to participate in outdoor recreation during the weekend.

Distance traveled by urban Missouri residents during the weekend and distance traveled by rural Missouri residents during the weekend differ significantly (Chart RO2.2a).

- 26.8% (n=99) of urban Missouri residents travel zero to four miles to participate in outdoor recreation during the weekend.
 - o 26.8% (n=99) of urban Missouri residents traveled zero to four miles to participate in outdoor recreation during the weekend compared to 19.0% (n=69) of rural Missouri residents.
- 22.8% (n=83) of rural Missouri residents traveled 100 miles or more to participate in outdoor recreation during the weekend.

Chart RO2.2a. Distance Traveled for Outdoor Recreation - Weekend

Research Question 3 (RQ3)

How many hours per week do Missouri residents participate in outdoor recreation?

Research Objective 3.1 (RO3.1)

• Determine how many hours Missouri residents participate in outdoor recreation <u>during the week</u> (i.e. Monday through Thursday).

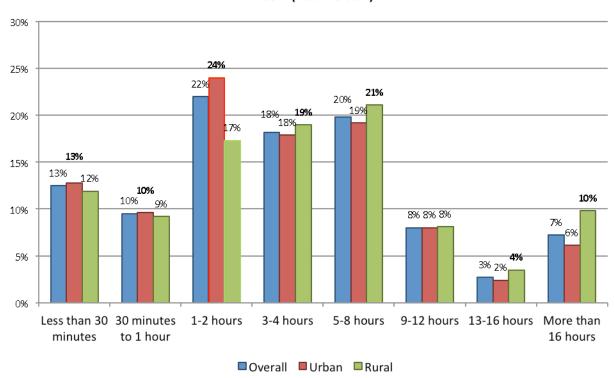

Respondents were asked how many hours their household participates in outdoor recreation during the week (Chart RO3.1a and Appendix B: q2).

- 22.0% (n_w=164) of Missouri residents participate in outdoor recreation between one and two hours during the week
- 37.7% (n_w=282) of Missouri residents participate in outdoor recreation at least five to eight hours during the week.

Hours of participation per week among urban Missouri residents and hours of participation per week among rural Missouri residents differed significantly (Chart RO3.1a).

- 24.0% (n=90) of urban Missouri residents participate in outdoor recreation one to two hours during the week.
 - o 35.7% (n=134) of urban Missouri residents participate in outdoor recreation at least five to eight hours during the week.
- 21.1% (n=78) of rural Missouri residents participate in outdoor recreation five to eight hours per week.
 - o 17.3% (n=63) of urban Missouri residents participate in outdoor recreation one to two hours during the week compared to 24.0% (n=90) of urban Missouri residents.
 - 42.5% (n=157) of rural Missouri residents participate in outdoor recreation at least five to eight hours during the week.

Chart RO3.1a. Hours Spent on Outdoor Recreation – Weekday

q2 How many hours does your household participate in outdoor recreation during the week? (Valid Percent)

Research Objective 3.2 (RO3.2)

• Determine how many hours Missouri residents participate in outdoor recreation <u>during the weekend</u> (i.e. Friday through Sunday)

Respondents were asked how many hours their household participates in outdoor recreation during the weekend (Chart RO3.2a and Appendix B: q4).

- 21.8% (n_w=161) of Missouri residents participate in outdoor recreation between three and four hours during the weekend.
- 45% (n_w=331) of Missouri residents participate in outdoor recreation at least five hours during the weekend.
- 66.8% (n_w=492) of Missouri residents participate in outdoor recreation at least three hours during the weekend.

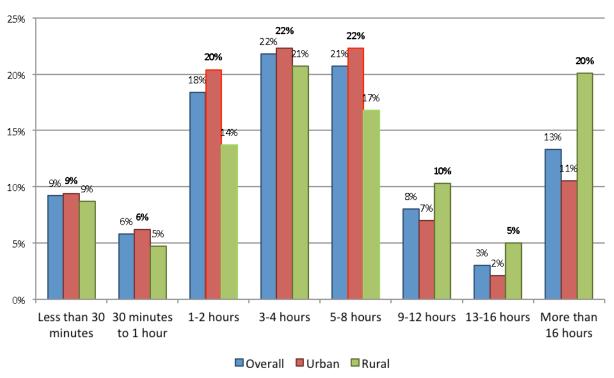

Hours of participation per weekend among urban Missouri residents and hours of participation per weekend among rural Missouri residents differ significantly (Chart RO3.2a).

• 22.3% (n=83) of urban Missouri residents participate in outdoor recreation between three and four hours per weekend and 22.3% (n=83) of urban Missouri residents participate in outdoor recreation between five and eight hours on the weekend.

- o 20.4% (n=76) of urban Missouri residents participate in outdoor recreation between one and two hours per weekend compared to 13.7% (n=49) of rural Missouri residents.
- 22.3% (n=83) of urban Missouri residents participate in outdoor recreation between five and eight hours per weekend compared to 16.8% (n=60) of rural Missouri residents.
- 41.9% (n=156) of urban Missouri residents participate in outdoor recreation at least five hours during the weekend.
- 64.2% (n=239) of urban Missouri residents participate in outdoor recreation at least three hours during the weekend.
- 20.7% (n=74) of rural Missouri residents participate in outdoor recreation three to four hours during the weekend.
 - 5.0% (n=18) of rural Missouri residents participate in outdoor recreation between 13 and 16 hours per weekend compared to 2.1% (n=8) of urban Missouri residents.
 - o 20.1% (n=72) of rural Missouri residents participate in outdoor recreation for more than 16 hours per weekend compared to 10.5% (n=39) of urban Missouri residents.
- 52.2% (n=187) of urban Missouri residents participate in outdoor recreation at least five hours during the weekend.
- 71.5% (n=261) of urban Missouri residents participate in outdoor recreation at least three hours during the weekend.

Chart RO3.2a. Hours Spent on Outdoor Recreation - Weekend

Management Problem

• How available is outdoor recreation in Missouri?

Research Question 4 (RQ4)

How satisfied are Missouri residents with the availability of outdoor recreation activities?

Research Objective 4.1 (RO4.1)

• Determine satisfaction of Missouri residents with the availability of local outdoor recreation activities.

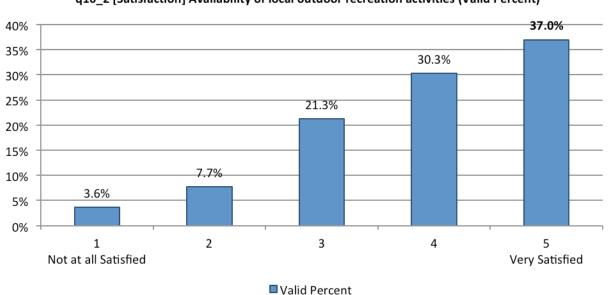

Respondents were asked how satisfied they are with the availability of local outdoor recreation activities, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO4.1a, Chart RO4.1a and Appendix B: q10_2).

- 37.0% (n_w=284) of Missouri residents are very satisfied with the availability of local outdoor recreation activities.
- 95% confident that satisfaction among Missouri residents with the availability of local outdoor recreation activities is between 3.82 and 3.96 ($\bar{x}_w = 3.89 + /-0.072$).

Table RO4.1a. Descriptive Statistics (urban and rural combined and weighted) q10_2 [Satisfaction] Availability of local outdoor recreation activities					
	Frequency	Mean_{w}	Std. Error	Std. Dev.	
q10_2 [Satisfaction] Availability of local outdoor recreation activities	768	3.89	0.037	1.018	

⁽w) Indicates weighted score

Chart RO4.1a. Satisfaction with Availability of Local Outdoor Recreation Activities

q10_2 [Satisfaction] Availability of local outdoor recreation activities (Valid Percent)

Action Standard 4.1 (AS4.1)

• IF satisfaction with availability of local outdoor recreation activities mean score is less than 3.0 OR top box score is less than 30% THEN recommend taking action (q10_2).

× No action recommended.

Research Objective 4.2 (RO4.2)

 Determine satisfaction of Missouri residents with the availability of organized/supervised outdoor recreation programs.

Respondents were asked how satisfied they are with organized/supervised outdoor recreation programs, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO4.2a, Chart RO4.2a and Appendix B: q10_8).

- 21.4% (n_w=164) of Missouri residents are very satisfied with the availability of organized/supervised outdoor recreation programs.
 - o 35.9% (n_w =276) of respondents chose 3/5.
- 95% confident that satisfaction among Missouri residents with the availability of organized/supervised outdoor recreation activities is between 3.62 and 3.54 ($\bar{x_w} = 3.46 + /-0.078$).

Table RO4.2a. Descriptive Statistics (urban and rural combined and weighted) q10_8 [Satisfaction] Availability of organized/supervised recreation programs

q10_8 [Satisfaction] Availability of organized/supervised recreation programs (Valid Percent)

Urban and rural populations were compared and there are no significant differences between the two populations.

Action Standard 4.2 (AS4.2)

• IF satisfaction with availability of organized/supervised outdoor recreation programs mean score is less than 3.5 OR top box score is less than 30% THEN recommend taking action (q10_8).

✓ Recommend taking action on the following:

• Satisfaction with availability of organized recreation programs mean score is less than 3.5 and top box is less than 30%.

What types of outdoor recreation activities do Missouri residents want to see more of in their local area?

Research Objective 5.1 (RO5.1)

• Determine what types of outdoor recreation activities Missouri residents want to see more of in their local area.

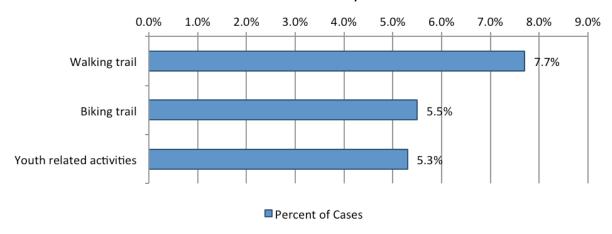

Respondents who did not indicate "Very satisfied" with either the availability or the variety of outdoor recreation activities in their local area were asked what outdoor recreation activities they would like to see more of in their local area (q11). Open ended responses were coded and tallied for all responses mentioned in at least 1% of cases (Table RO5.1a, Chart RO5.1a and Appendix B: \$q11_c).

· · -		would you like to see more of in your local area? Responses Percent of				
		N _w	Percent	Cases

Chart RO5.1a. More Activities Desired

q11 What activities would you like to see more of in your local area? (Frequencry > 5%, Percent of Cases)

Action Standard 5.1 (AS5.1)

• IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with availability of local outdoor recreation activities OR IF more than 8.85% (n=68) of respondents in the total sample (n=768) OR more than 17.7% (n=68) of respondents from either the rural or urban samples scored less than a 5/5 on satisfaction with availability of organized/supervised outdoor recreation programs AND more than 5% mentioned an activity when asked what types of activities they would like to see more of in their area THEN recommend taking action (q10_2, q10_8 and q11).

✓ Recommend taking action on the following:

- Walking trails (7.7%, n=59)
- Biking trails (5.5%, n=42)
- Youth related activities (5.3%, n=41)

How available are outdoor recreation facilities in Missouri?

Research Objective 6.1 (RO6.1)

Determine proximity of Missouri residents to the closest local outdoor recreation facility.

Respondents were asked how close their residence is to an outdoor recreation facility (Chart RO6.1a and Appendix B: q17).

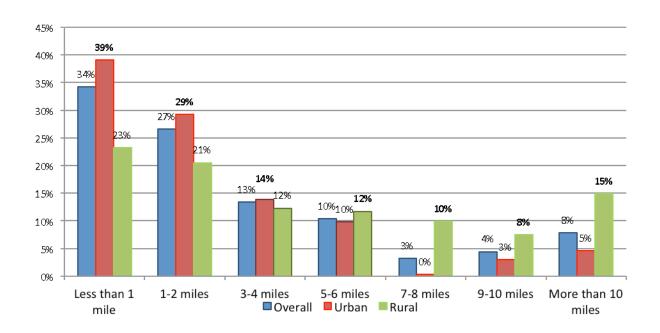

- 34.2% (n_w=252) of Missouri residents live less than one mile from an outdoor recreation facility.
- 60.8% (n_w=448) of Missouri residents live within 2 miles of an outdoor recreation facility.

Distance to a recreation facility differs significantly between urban and rural residents (Chart RO6.1a).

- 39.1% (n=143) of urban Missouri residents live less than one mile from an outdoor recreation facility.
 - o 39.1% (n=143) of urban Missouri residents live within one mile of an outdoor recreation facility compared to 23.2% (n=87) of rural Missouri residents.
 - o 29.2% (n=107) of urban Missouri residents live one to two miles from an outdoor recreation facility compared to 20.5% (n=77) of rural Missouri residents.
- 68.3% (n=250) of urban Missouri residents live less than two miles from an outdoor recreation facility.
- 23.2% (n=87) of rural Missouri residents live less than one mile from an outdoor recreation facility.
 - o 9.9% (n=37) of rural Missouri residents live seven to eight miles from an outdoor recreation facility compared to 0.3% (n=1) of urban Missouri residents.
 - o 7.5% (n=28) of rural Missouri residents live nine to ten miles from an outdoor recreation facility compared to 3.0% (n=11) of urban Missouri residents.
 - o 14.9% (n=56) of rural Missouri residents live more than ten miles from an outdoor recreation facility compared to 4.6% (n=17) of urban Missouri residents.
- 43.7% (n=164) of rural Missouri residents live within two miles of an outdoor recreation facility.

Chart RO6.1a. Distance to Nearest Facility

q17 How close is your residence to an outdoor recreation facility? (Valid Percent)

Research Objective 6.2 (RO6.2)

Determine availability of outdoor recreation facilities among Missouri residents.

Respondents were asked how often their household uses different types of outdoor recreation facilities. Respondents were given the option of choosing unavailable if that type of facility is not available (Table RO6.2a, Chart RO6.2a and Appendix B: q13_1 through q13_34).

- 13.6% (n_w=105) of Missouri residents do not have walkable streets or sidewalks available to their household.
- 10.2% (n_w=78) of Missouri residents do not have dog parks available to their household.
- 8.5% (n_w=65) of Missouri residents do not have ATV/ORV riding areas available to their household.
- 6.2% (n_w=48) of Missouri residents do not have outdoor aquatic complexes available to their household.

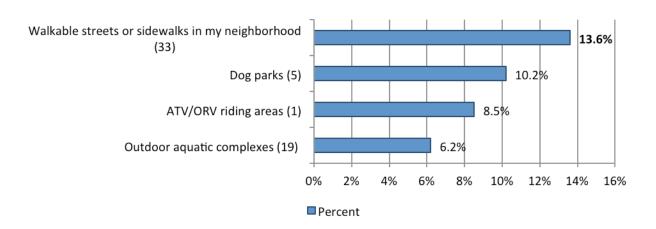

Table RO6.2a. Frequencies (urban and rural combined and weighted) q13 How often do you or a member of your household use [X]? (facility is unavailable)

	Facility Type	Frequency _w	Percent
	Walkable streets or sidewalks in my neighborhood (33)	105	13.60%
	Dog parks (5)	78	10.20%
	ATV/ORV riding areas (1)	65	8.50%
	Outdoor aquatic complexes (19)	48	6.20%
	National or state forests (16)	35	4.60%

Chart RO6.2a. Frequency of Facility Use

q13 How often do you or a member of your household use [x]? (Unavailable, Percent)

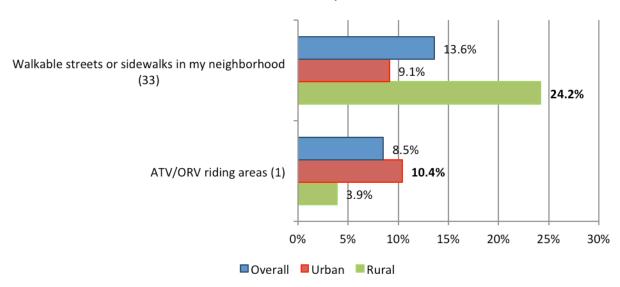

Facility availability differs significantly between urban and rural residents.

Responses were tallied by region (urban vs. rural) and sorted from high to low (Chart RO2.6b).

- Walkable streets or sidewalks are more available to urban Missouri residents (n=35, 9.1% unavailable) than rural Missouri residents (n=93, 19.5% unavailable).
- ATV/ORV riding areas are more available to rural Missouri residents (n=15, 3.9% unavailable) than rural Missouri residents (n=40, 10.4% unavailable).

Chart RO6.2b. Frequency of Facility Use - Urban vs. Rural

q13 How often do you or a member of your household use [x]? (Unavailable, Valid Percent)

Action Standard 6.2 (AS6.2)

• IF more than 5% of respondents do not have a specific type of facility available THEN recommend taking action (q13_1 through q13_34).

✓ Recommend taking action on the following:

- Walkable streets and sidewalks in my neighborhood (13.6% unavailable, n_w=105).
 - Less available to rural residents (24.2% unavailable, n=93) compared to urban residents (9.1% unavailable, n=35).
- Dog Parks (10.2%, n_w=78).
- ATV/ORV riding areas (8.5%, n_w=65).
 - Less available to urban residents (10.4% unavailable, n=40) compared to rural residents (3.9% unavailable, n=15).
- Outdoor aquatic complexes (6.2%, n_w=48).

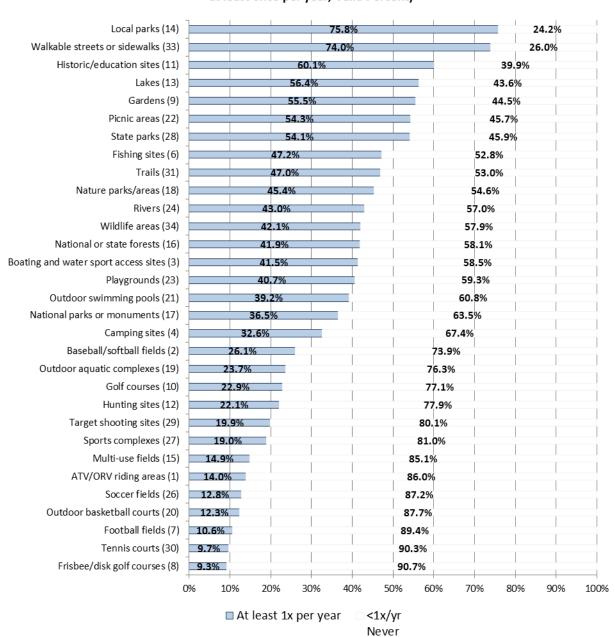

Research Objective 6.3 (RO6.3)

Determine supply of local outdoor recreation facilities among Missouri residents.

Respondents who use a facility type at least once per year or more were asked to rate the local supply in their area. Facilities used at least once per year by more than 8.8% (n=68) of respondents were tallied (Chart RO6.3a and Appendix B: q13 1 through q13 34).

Chart RO6.3a. Missourians Who Use Facility At Least 1/x a Year

q13 How often do you or a member of your household use [x]? (at least 8.8% (n=68) use at least once per year, Valid Percent)

Respondents were sorted by about right percentages based on the total percent who indicated about right to q14 (Chart RO6.3b); and based on the percent who indicated about right to q14 among those who use the facility at least once per year (Chart RO6.3c). All responses to q14 can be found in Appendix B: q14_1 through q14_34.

Chart RO6.3b. Missourians Who Rate Facility Supply About Right

q14 How would you rate the supply of [X] in your area? (total sample, supply is about right, Percent)

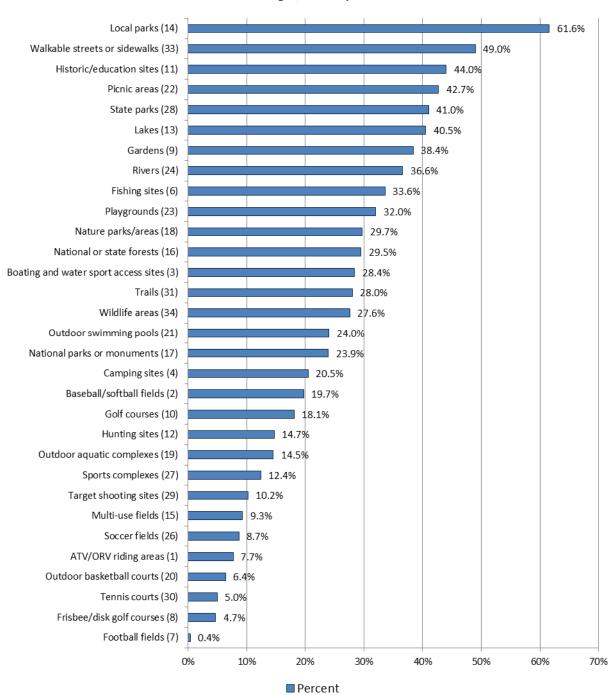

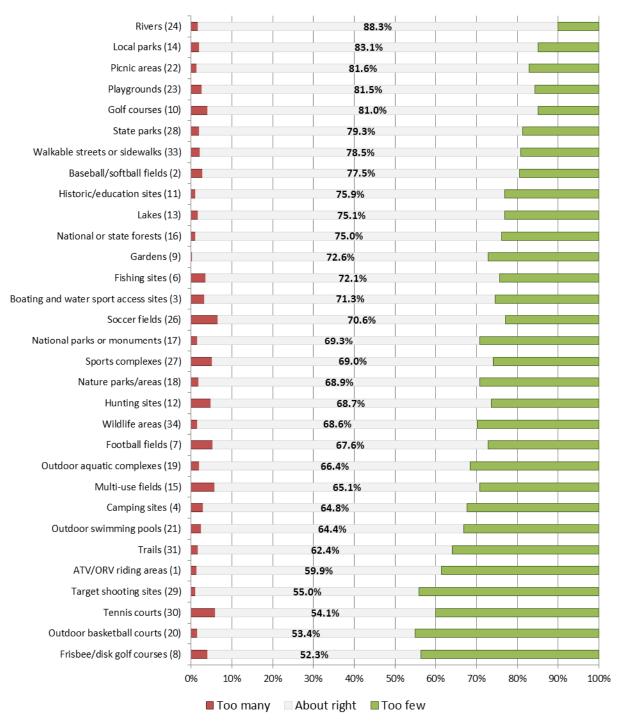

Chart RO6.3c. Missourians Using Facility At Least 1x/Year Rate Facility Supply

Way too few and too few percentages were combined and tallied, then sorted by percentage of total sample (Chart RO6.3d) and percentage of those who use at least once per year (Chart RO6.3e, about right percent is collapsed in order to emphasize too few and too many percentages).

Chart RO6.3d. Missourians Who Rate Facility Supply Inadequate

q14 How would you rate the supply of [x] in your area? (at least 8.8% (n=68) use at least once per year, Way too few and Too few combined, Percent)

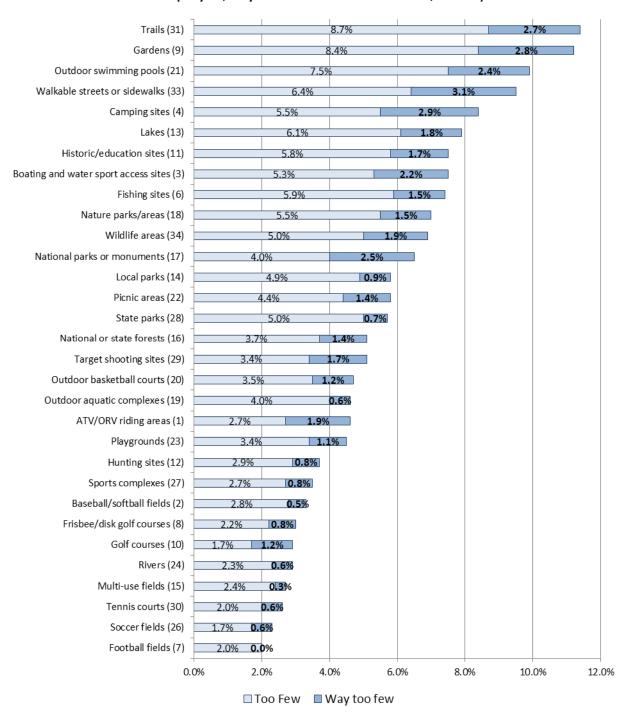

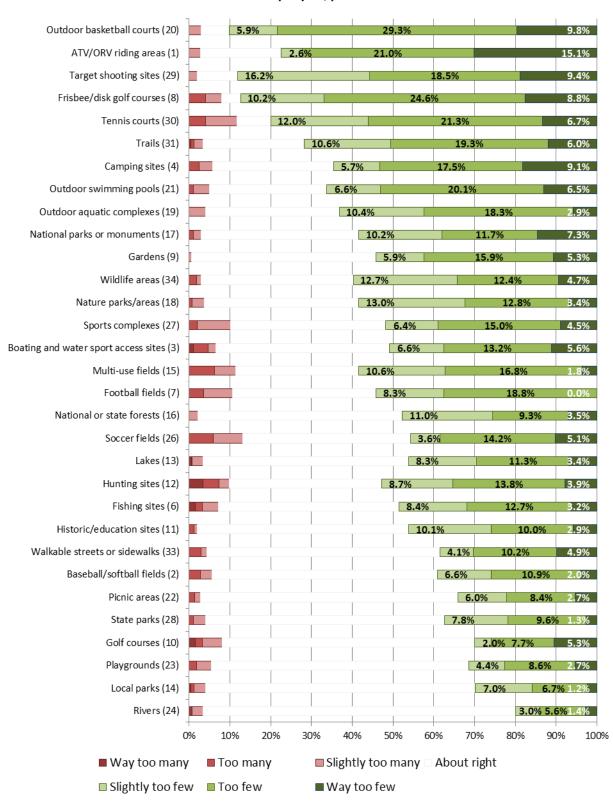

Chart RO6.3e. Missourians Using Facility At Least 1x/Year Rate Supply

q14 How would you rate the supply of [x] in your area? (at least 8.8% (n=68) use at least once per year, percent

Way too few and too few responses were combined for responseents that use a facility at least once per year (Chart RO6.3f).

- Among the 23.7% (n_w=167) of Missouri residents that use outdoor aquatic complexes at least once per year,
 21.2% (n_w=36) indicated supply was either way too few or too few.
- Among the 19.9% (n_w=145) of Missouri residents that use target shooting sites at least once per year, 27.9% (n_w=39) indicated supply was either way too few or too few.
- Among the 14.0% (n_w =99) of Missouri residents that use ATV/ORV riding areas at least once per year, 36.1% (n_w =36) indicated supply was either way too few or too few.
- Among the 12.3% (n_w =91) of Missouri residents that use outdoor basketball courts at least once per year, 39.1% (n_w =36) indicated supply was either way too few or too few.
- Among the 9.7% (n_w =72) of Missouri residents that use tennis courts at least once per year, 28.0% (n_w =20) indicated supply was either way too few or too few.
- Among the 9.3% (n_w =68) of Missouri residents that use Frisbee/disk golf courses at least once per year, 34.4% (n_w =23) indicated supply was either way too few or too few.

How likely are Missouri residents to use currently unavailable facilities if they were made available?

Research Objective (RO7.1)

• Determine the likelihood of Missouri residents to use currently unavailable facilities if they were made available.

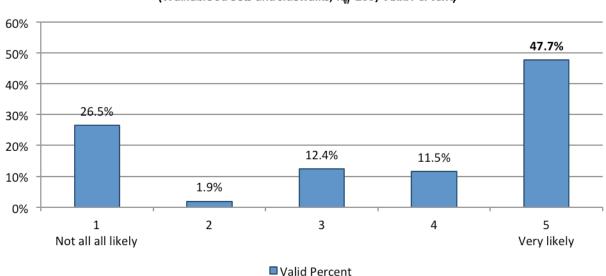

Respondents who do have a facility type in their local area were asked how likely they would be to use one if it were available (Table RO7.1a, Chart RO7.1a, Table RO7.1b, Chart RO7.1b and Appendix B: q15).

- 90% confident that likelihood to use walkable streets and sidewalks among Missouri residents is between 3.25 and 3.79 ($\bar{x_w} = 3.52 + /-0.271$).
- 90% confident that likelihood to use dog parks among Missouri residents is between 2.348 and 3.01 ($\bar{x_w}$ = 2.68 +/- 0.332).

Table RO7.1a. Descriptive Statistics (urban and rural combined and weighted) q15 Assuming [x] was available, how likely would you or a member of your household be to use [x]?

q15_5 Assuming [x] was available in your area, how likely would you be to use [x]? (dog parks, n_w=78, Valid Percent)

Action Standard 7.1 (AS7.1)

• IF more than 8.85% (n=96) of respondents in the total sample (n=768) OR more than 17.7% (n=96) of respondents from either the rural or urban samples do not have a facility type available AND likelihood to use the facility if it were available mean score is above 3.5 THEN recommend taking action (q13_1 through q13_34 and q15_1 through q15_34).

✓ Recommend taking action on the following:

• Walkable streets and sidewalks in my neighborhood are unavailable to 13.6% (n_w=105) of Missouri residents and likelihood to use if available mean score is greater than 3.50.

How satisfied are Missouri residents with the availability of outdoor recreation facilities?

Research Objective 8.1 (RO8.1)

Determine satisfaction of Missouri residents with the number of outdoor recreation facilities.

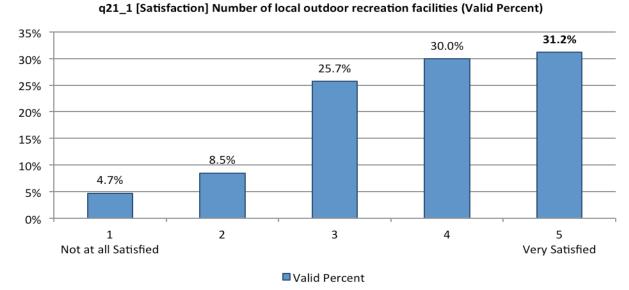

Respondents were asked how satisfied they are with the number of outdoor recreation facilities in their local area, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO8.1a, Chart RO8.1a and Appendix B: q21).

- 31.2% (n_w=234) of Missouri residents are very satisfied with the number of local outdoor recreation facilities.
- 95% confident that satisfaction among Missouri residents with the number of local outdoor recreation facilities is between 3.67 and 3.83 ($\bar{x_w} = 3.75 + /-0.80$).

What types of outdoor recreation facilities do Missouri residents want to see more of in their local area?

Research Objective 9.1 (RO9.1)

• Determine what types of outdoor recreation facilities Missouri residents want to see more of in their local area.

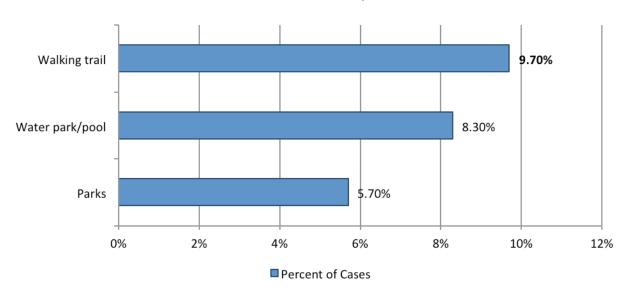

Respondents that did not indicate "Very satisfied" with either the number or the availability of outdoor recreation facilities in their local area were asked what outdoor recreation facilities they would like to see more of in their local area (q22). Open ended responses were coded and tallied for all responses mentioned in at least 1% of cases (Table RO9.1a, Chart RO9.1a, and Appendix B: \$q22_c).

- Walking trails (9.8%, n=75)
- Water park/pool (7.6%, n=58)
- Parks (5.7%, 44)

Management Problem

• How popular is outdoor recreation among Missouri residents?

Research Question 10 (RQ10)

• How often do Missouri residents participate in outdoor recreation activities?

Research Objective 10.1 (RO10.1)

• Determine how often Missouri residents participate in outdoor recreation activities.

Respondents were asked how often their household participates in various outdoor recreation activities (q5, Appendix B: q5). Activities for which more than 20% of Missouri residents participate at least once per year were tallied (Chart RO10.1a) and broken down by how frequently they participate. The highest frequency for each type of facility was noted. Darker bars correspond to more frequent use (Chart RO10.1b).

Chart RO10.1a. Missourians Who Participate in Activities At Least 1/x Per Year

q5 How often does your household participate in [x]? (at least 20% participate at least once per year, Valid Percent)

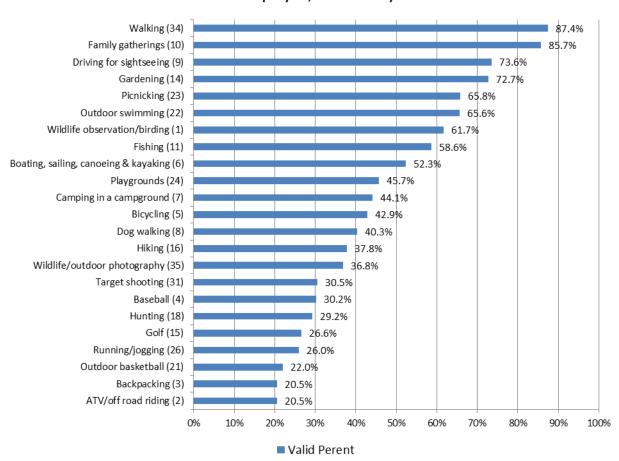

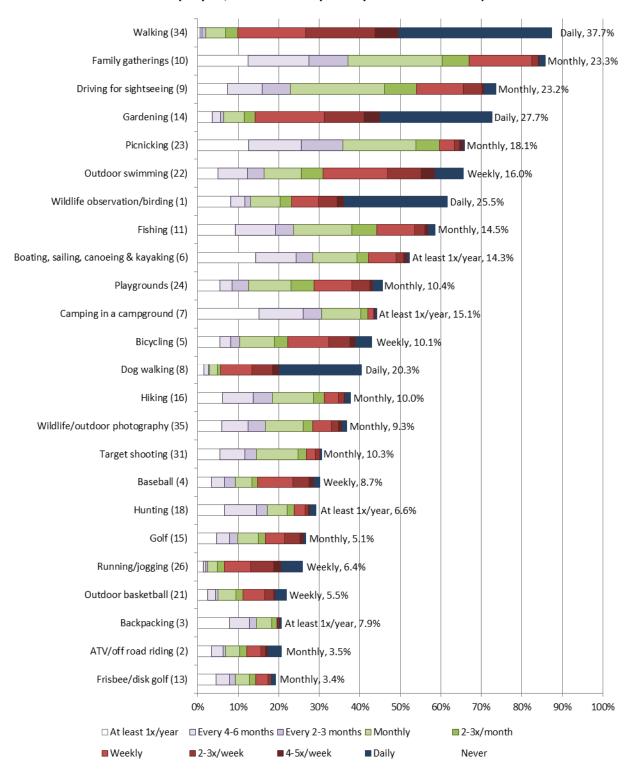

Chart RO10.1b. Frequency of Participation in Activities

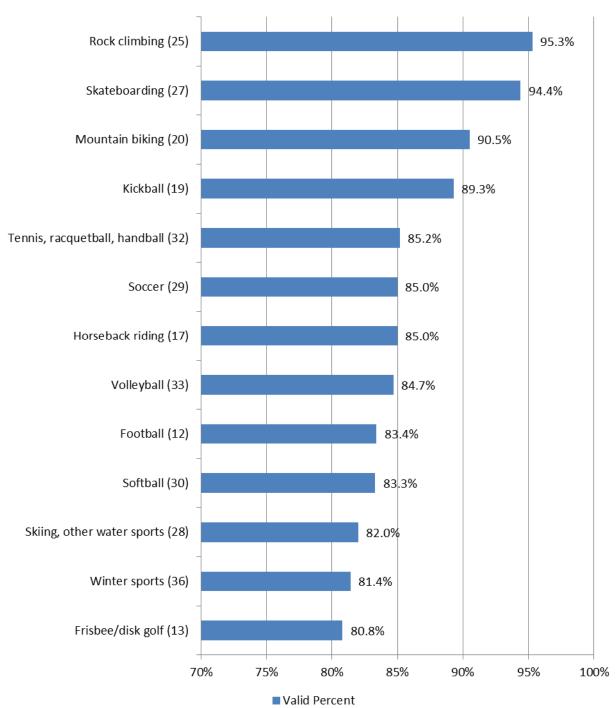

q5 How often does your household participate in [x]? (at least 20% participate at least once per year, broken down by activity level. Valid Percent)

Responses were also tallied for facility types that are not used by at least 80% of Missouri residents (i.e. do not use percentage or use at least once per year percentage) (Chart RO10.1c).

Chart RO10.1c. Missourians Who Never Participate in Activities

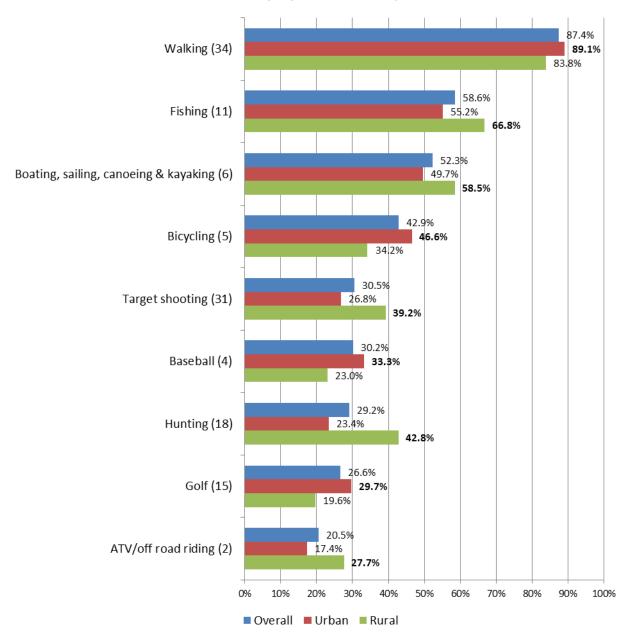

Activity participation differed significantly between urban and rural Missouri residents that participate in an activity at least once per year. Significantly different activity levels above 20% (i.e. at least 20% of respondents participate at least once per year) were tallied by region (urban vs. rural) and sorted from high to low (RO10.1d). Other significantly

different activity levels (at least once every 4-6 months, at least once every 2-3 months, etc.) are available in Appendix B: q5.

Chart RO10.1d. Frequency of Participation in Activities – Urban vs. Rural

Action Standard 10.1 (AS10.1)

• IF more than 20% of respondents use a facility at least once per year THEN recommend taking action (q5).

✓ Recommend taking action on the following:

- Walking (87.4%, n_w=671).
 - Higher participation among urban residents (89.1%, n=342) compared to rural residents (83.8%, n321).
- Family gatherings (85.7%, n_w=658).
- Driving for sightseeing (73.6%, n_w=566).
- Gardening (72.7%, n_w=558).
- Picnicking (65.8%, n_w=505).
- Outdoor swimming (65.6%, n_w=504).
- Wildlife observation/birding (61.7%, n_w=474).
- Fishing (58.6%, n_w=450).
 - Higher participation among rural residents (66.8%, n=256) compared to urban residents (58.2%, n=212).
- Boating, sailing, canoeing and kayaking (52.3%, n_w=402).
 - Higher participation among rural residents (58.5%, n=224) compared to urban residents (49.7%, n=191).
- Playgrounds (45.7%, n_w=351).
- Camping in a campground (44.1%, n_w=339).
- Bicycling (42.9%, n_w=329).
 - Higher participation among urban residents (46.6%, n=179) compared to rural residents (58.5%, n=224).
- Dog Walking (40.3%, n_w=310).
- Hiking (37.8%, n_w=290).
- Wildlife/outdoor photography (36.8%, n_w=283).
- Target shooting (30.5%, n_w=234).
 - Higher participation among rural residents (39.5%, n=150) compared to urban residents (26.8%, n=103).

 Are <u>activity</u> levels of various outdoor recreation activities in Missouri increasing, decreasing, or remaining the same among Missouri residents?

Research Objective 11.1 (RO11.1)

Decrease a lot

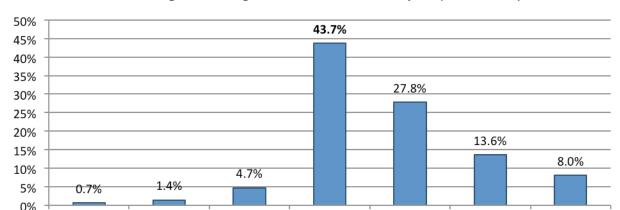

Determine overall perceived outdoor recreation activity level change among Missouri residents.

Respondents were asked if they see their household's overall outdoor recreation usage increasing a lot, increasing, increasing a little, not changing, decreasing a little, decreasing, or decreasing a lot more than the next five years (Chart RO11.1a, and Appendix B: q12).

- 49.4% (n_w=381) of Missouri residents perceive their household's overall outdoor recreation usage increasing at least a little more than the next five years.
- 21.6% (n_w=167) of Missouri residents perceive their household's overall outdoor recreation usage increasing or increasing a lot in the next five years.

Chart RO11.1a. Change in Participation Next Five Years

Decrease

Action Standard 11.2 (AS11.2)

• IF more than 8.85% (n=96) of respondents in the total sample (n=768) OR more than 17.7% (n=96) of respondents from either the rural or urban participate in a specific activity in their area AND more than 20% indicate their activity is either increasing or increasing a lot THEN recommend taking action (q5_1 through q5_36 and q6_1 through q6_36).

✓ Recommend taking action on the following:

- Fishing (58.6%, n_w=450).
 - o 20.0% of Missouri residents will either increase or increase activity a lot in the next five years.
- Camping in a campground (44.1%, n_w=339).
 - o 24.4% of Missouri residents with either increase or increase activity a lot in the next five years.
- Bicycling (42.8%, n_w=329).
 - o 26.9% of Missouri residents will either increase or increase activity a lot in the next five years.
- Baseball (30.2%, n_w=232).
 - o 22.0% of Missouri residents will either increase or increase a lot in the next five years.
- Golf (26.7%, n_w=205).
 - o 21.0% of Missouri residents will either increase or increase activity a lot in the next five years.
- Running/jogging (26.0%, n_w =200).
 - o 21.1% of Missouri residents will either increase or increase a lot in the next five years.
- Soccer (15.0%, n_w=115).
 - o 25.7% of Missouri residents will either increase or increase a lot in the next five years.

• How often do Missouri residents use outdoor recreation facilities in Missouri?

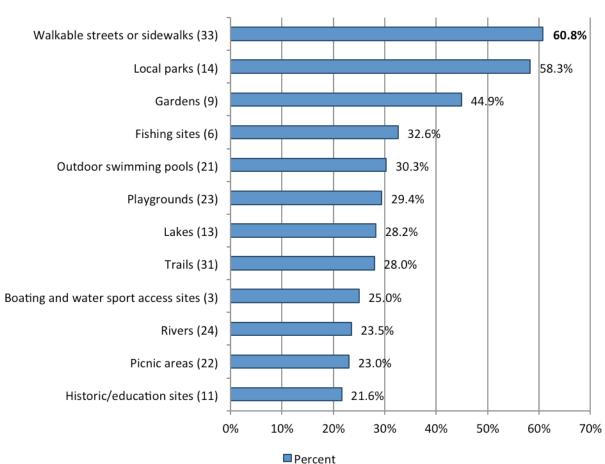

Research Objective 12.1 (RO12.1)

• Determine how often Missouri residents use outdoor recreation facilities in Missouri.

Respondents were asked how often they use outdoor recreation facilities in Missouri (q13). Facilities used by at least 20% of the population were tallied and charted (Chart RO12.1a and Appendix B: q13).

Chart RO12.1a. Use Facility At Least Monthly

Monthly usage among urban Missouri residents and monthly usage among rural Missouri residents differed significantly (Chart RO12.1b).

Action Standard 12.2 (AS12.2)

IF more than 5% of respondents mention an unlisted facility type THEN recommend taking action (q16).

✓ Recommend taking action on the following:

• Parks (6.8%, n=52).

Management Problem

• Why aren't Missouri residents participating in outdoor recreation activities?

Research Question 13 (RQ13)

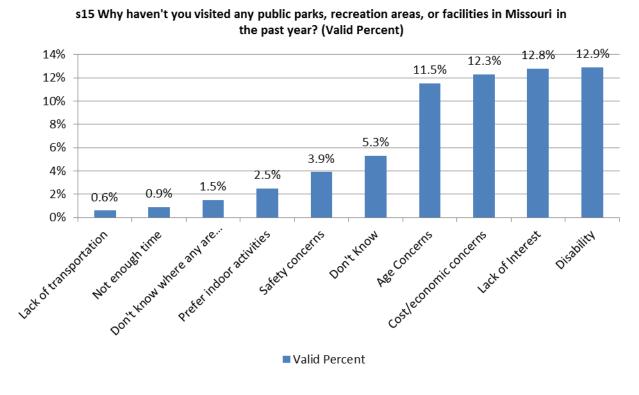

Why aren't Missouri residents participating in outdoor recreation activities?

Research Objective 13.1 (RO13.1)

• Determine reasons Missouri residents aren't participating in outdoor recreation activities.

Respondents who did not participate in outdoor recreation at least once in the past year (s14) were asked why they have not participated before being terminated for the survey (s15). A total of n=227 respondents provided answers (Chart RO13.1a, Appendix B: s15).

Chart RO13.1a. Why Missourians Don't Participate in Outdoor Recreation

Among those that answered other, 22.9% (n=11, 4.8% of those answering s15) indicated they have a farm or other property they use for recreation. 10.4% of those that answered other indicated the weather being too hot (n=5, 2.2% of those that answered s15) and 10.4% of those that answered other indicated being too busy/not having time (n=5, 2.2%).

Management Problem

• How satisfied are Missouri residents with outdoor recreation in Missouri?

Research Question 14 (RQ14)

How satisfied are Missouri residents with outdoor recreation activities in Missouri?

Research Objective 14.1 (RO14.1)

Determine overall satisfaction of Missouri residents with outdoor recreation activities in Missouri.

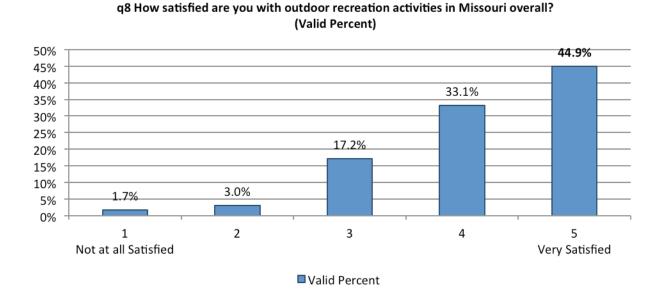

Respondents were asked how satisfied they are with outdoor recreation activities in Missouri overall, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO14.1a, Chart RO14.1a and Appendix B: q8).

- 44.9% (n_w=345) of Missouri residents are very satisfied overall with outdoor recreation activities in Missouri.
- 95% confident that overall satisfaction among Missouri residents with the outdoor recreation activities in Missouri is between 4.10 and 4.24 ($\bar{x_w}$ =4.17 +/- 0.067).

q21_7 [Satisfaction] Distance to facilities (Valid Percent)

Action Standard 17.7 (AS17.7)

• IF satisfaction with distance to local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_7).

No action recommended.

Research Objective 17.8 (RO17.8)

 Determine satisfaction of Missouri residents with travel time and congestion to local outdoor recreation facilities.

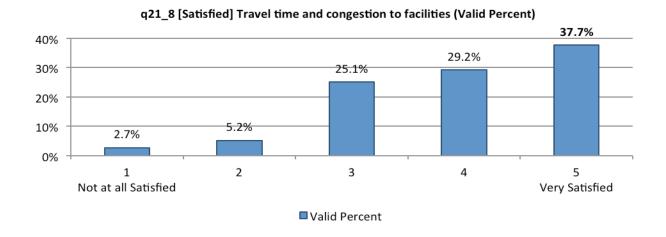

Respondents were asked how satisfied they are travel and congestion to facilities, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO17.8a, Chart RO17.8a and Appendix B: q21_8).

- 37.7% (n_w=283) of Missouri residents are very satisfied with travel time and congestion to local outdoor recreation facilities.
- 95% confident that satisfaction among Missouri residents with travel time and congestion to local outdoor recreation facilities is between 3.87 and 4.01 ($x_w = 3.94 + /-0.074$).

Table RO17.8a. Descriptive Statistics (urban and rural combined and weighted) q21_8 [Satisfaction] Travel time and congestion to facilities							
	Frequency	Mean_{w}	Std. Error	Std. Dev.			
q21_8 [Satisfied] Travel time and congestion to facilities	761	3.94	0.038	1.04			

⁽w) Indicates weighted score

Chart RO17.8a. Satisfaction with Travel Time and Congestion to Local Facilities

Action Standard 17.8 (AS17.8)

• IF satisfaction with travel time and congestion to local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_8).

× No action recommended.

Research Objective 17.9 (RO17.9)

 Determine satisfaction of Missouri residents with pet/dog accommodations of local outdoor recreation facilities.

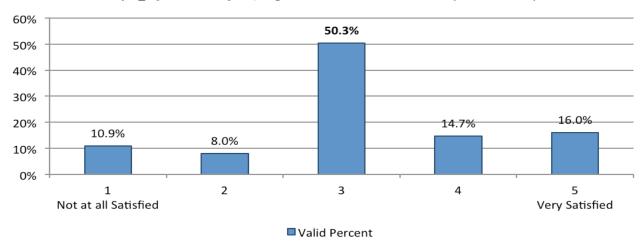

Respondents were asked how satisfied they are with pet/dog accommodations at facilities, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO17.9a, Chart RO17.9a and Appendix B: q21_9).

- 16.0% (n_w=120) of Missouri residents are very satisfied overall with pet/dog accommodations at facilities.
- 95% confident that satisfaction among Missouri residents with pet/dog accommodations at local outdoor recreation facilities is between 3.09 and 3.25 ($\bar{x_w} = 3.17 + /-0.080$).

Table RO17.9a. Descriptive Statistics (urban and rural combined and weighted) q21_9 [Satisfaction] Pet/dog accommodations at facilities							
	Frequency	Mean_{w}	Std. Error	Std. Dev.			
q21_9 [Satisfaction] Pet/dog accommodations at facilities	761	3.17	0.041	1.131			

(w) Indicates weighted score

Chart RO17.9a. Satisfaction with Pet/Dog Accommodations at Local Facilities

q21_9 [Satisfaction] Pet/dog accommodations at facilities (Valid Percent)

Action Standard 17.9 (AS17.9)

• IF satisfaction with pet/dog accommodations of local outdoor recreation facilities mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_9).

✓ Recommend taking action on the following:

• Satisfaction with pet/dog accommodations at facilities mean score is less than 3.5 and top box is less than 30%.

Research Objective 17.10 (RO17.10)

Determine satisfaction of Missouri residents with the professionalism of local outdoor recreation employees.

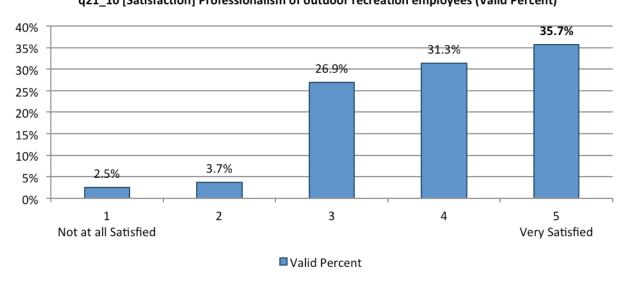

Respondents were asked how satisfied they are the professionalism of outdoor recreation employees, using a 1 to 5 scale with 1 being "Not at all satisfied" and 5 being "Very Satisfied" (Table RO17.10a, Chart RO17.10a and Appendix B: q21_10).

- 35.7% (n_w=268) of Missouri residents are very satisfied overall with the professionalism of local outdoor recreation employees.
- 95% confident that satisfaction among Missouri residents with the professionalism of local outdoor recreation employees is between 3.87 and 4.01 ($\bar{x_w} = 3.94 + /-0.070$).

Chart RO17.10a. Satisfaction with Professionalism of Staff at Local Facilities

q21_10 [Satisfaction] Professionalism of outdoor recreation employees (Valid Percent)

Action Standard 17.10 (AS17.10)

- IF satisfaction with professionalism of local outdoor recreation employees mean score is below a 3.5 OR top box score is below 30% THEN recommend taking action (q21_10).
- × No action recommended.

 What is the relative importance of various aspects of outdoor recreation in Missouri compared to their performance?

Research Objective 18.1 (RO18.1)

Determine relative importance of various aspects of outdoor recreation activities.

Overall satisfaction with outdoor recreation activities in Missouri (q8) and satisfaction with outdoor recreation in the local area (q9) were both correlated with satisfaction with various aspects of outdoor recreation activities in Missouri (q10_1 through q10_8) and the correlations were squared in order to determine the relative importance of each measure (Chart RO18.1a, Table RO18.1a, Table RO18.1b, and Appendix B: Relative Importance).

Chart RO18.1a. Satisfaction with Various Aspects of Outdoor Recreation Activities

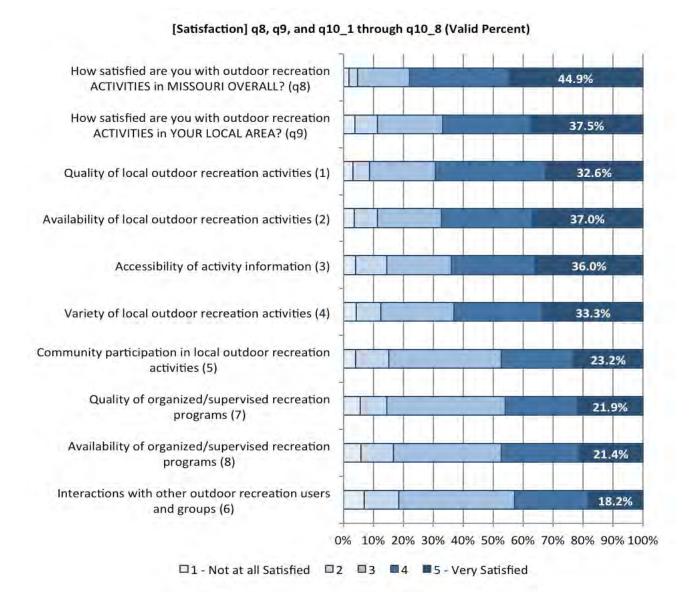

Table RO18.1a. Descriptive Statistics (urban and rural combined and weighted) Relative Importance (Correlated against q8 [Satisfaction] Activities in Missouri overall)		
	Relative Importance	Mean Score _w
How satisfied are you with outdoor recreation ACTIVITIES in MISSOURI OVERALL? (q8)	1	4.17

⁽w) Indicates weighted score

Research Objective 18.3 (RO18.3)

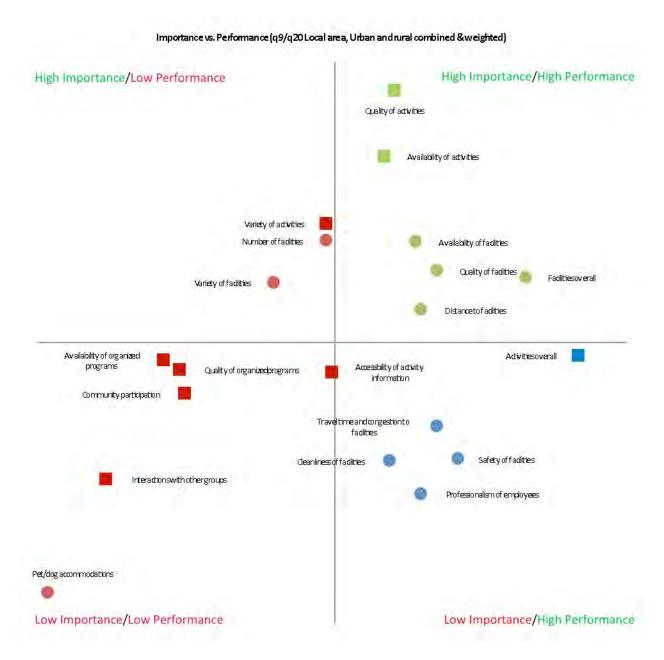

• Determine the relative performance of various aspects of outdoor recreation facilities and activities compared to their performance.

Relative importance was charted vs. performance (satisfaction) was charted for both Missouri overall (Chart RO18.3a) and the local area (Chart RO18.3b) across all activity and facility aspects.

Chart RO18.3a. Importance/Performance - Missouri Overall

Chart RO18.3b. Importance/Performance - Local Area

Action Standard 18.3.1 (AS18.1)

• IF relative importance score is ABOVE the 50th percentile AND satisfaction mean score is ABOVE the 50th percentile THEN maintain performance and maintain emphasis (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

✓ Recommend maintaining performance of the following:

- Both on the local level and in Missouri overall:
 - Quality of activities
 - Availability of activities
 - Quality of facilities
 - Availability of facilities
 - Distance to facilities
- In Missouri overall:
 - o Variety of activities
 - o Quality of activities
 - Safety of facilities

Action Standard 18.3.2 (AS18.2)

• IF relative importance score is ABOVE the 50th percentile AND satisfaction mean score is BELOW the 50th percentile THEN emphasize increasing performance (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).

✓ Recommend increasing performance on the following:

- Both on the local level and in Missouri overall:
 - o Number of facilities
 - o Variety of facilities
- In local areas:
 - Variety of activities

Action Standard 18.3.3 (AS18.3)

• IF relative importance score is BELOW the 50th percentile AND satisfaction mean score is ABOVE the 50th percentile THEN deemphasize and shift resources to elements determined by AS18.1 (q8, q9, q10_1 through q10_8, q19, and q21_1 through q21_10).

✓ Recommend deemphasizing the following:

- Both on the local level and in Missouri overall:
 - o Professionalism of outdoor recreation employees
 - o Cleanliness of facilities
 - Travel time and congestion to facilities
- In Missouri overall:
 - Accessibility of activity information

- In local areas:
 - Safety of facilities

Action Standard 18.3.4 (AS18.4)

- IF relative importance score is BELOW the 50th percentile AND satisfaction mean score is BELOW the 50th percentile THEN take action but deemphasize (q8, q9, q10_1 through q10_8, q19, q19, and q21_1 through q21_10).
- ✓ Recommend taking action as well as deemphasizing the following:
 - Both on the local level and in Missouri overall:
 - o Interactions with outdoor recreation activity users and groups
 - o Pet/dog accommodations at facilities
 - o Community participation in local outdoor recreation activities
 - o Availability of organized/supervised outdoor recreation programs
 - o Quality of organizes/supervised outdoor recreation programs
 - In local areas:
 - o Accessibility of activity information

Management Problem

• What are some opinions and perceptions of Missouri residents regarding outdoor recreation in Missouri?

Research Question 19 (RQ19)

• How do Missouri residents perceive outdoor recreation in Missouri?

Research Objective 19.1 (RO19.1)

• Determine perceptions of Missouri residents regarding outdoor recreation in Missouri.

Respondents were asked how much they agree or disagree with a number of statements regarding outdoor recreation, using a seven-point Likert scale with the following categories: Strongly agree, agree, slightly agree, neither agree nor disagree, slightly disagree, disagree and strongly disagree (Chart RO19.1a and Appendix B: q23).

- More than 75% of Missouri residents agree or strongly agree that outdoor recreation benefits Missouri residents (75.5%, n_w=619).
 - More than 25% of Missouri residents strongly agree that outdoor recreation benefits Missouri residents (28.1%, n_w=211).
- More than 75% of Missouri residents agree or strongly agree that outdoor recreation is important to them $(77.7\%, n_w=591)$.
 - \circ More than 25% of Missouri residents strongly agree that outdoor recreation is important to them (28.7%, n_w =215).
- More than 60% of Missouri residents agree that Missouri is well known for outdoor recreation (69.1%, n_w =579).
- More than 50% of Missouri residents agree that funding outdoor recreation in Missouri is a high priority (55.7%, n_w=418).
- More than 50% of Missouri residents agree that trails are important to their household (53.5%, n_w=401).

Chart RO19.1a. Perceptions of Missourians Regarding Outdoor Recreation

Outdoor recreation benefits 28.1% 54.4% Missouri residents (5) ■ Strongly disagree Outdoor recreation is important to 48.5% 28.7% me (3) ■ Disagree ■ Slightly disagree Missouri is well known for outdoor 49.4% 19.7% ☐ Neither agree nor disagree recreation (2) ■ Slightly agree Funding outdoor recreation in 41.7% 14.0% Agree Missouri is a high priority (4) ■ Strongly agree Trails are important to my 37.2% 16.3% household (1) Ω% 20% 40% 60% 80% 100%

q23_1 through q23_5 How much do you agree/disagree with the following statements?

(Valid Percent)

Research Objective 19.2 (RO19.2)

Determine perceptions of Missouri parents with regard to their children's outdoor recreation activities.

Respondents with children under 18 in the household were asked how much they agree or disagree with a number of statements regarding outdoor recreation, using a seven-point Likert scale with the following categories: Strongly agree, agree, slightly agree, neither agree nor disagree, slightly disagree and strongly disagree (Chart RO19.2a and Appendix B: q23).

- More than 60% of Missouri residents agree or strongly agree that the outdoor recreation facilities in their local area satisfy their children's activity needs (62.7%, n_w=172).
- More than 50% of Missouri residents agree or strongly agree that their children participate in enough outdoor recreation activities (59.6%, n_w=164).

Chart RO19.2a. Satisfaction of Missouri Parents Regarding Facilities and Children's Activity

(Valid Percent) The outdoor recreation facilities in ■ Strongly disagree my local area satisfy my childrens 48.9% ■ Disagree activity needs (7) ■ Slightly disagree My children participate in enough 42.6% ☐ Neither agree nor disagree outdoor recreation activities (6) ■ Slightly agree 0% 20% 40% 60% 80% 100%

q23_6 and q23_7 How much do you agree/disagree with the following statements?

Management Problem

 Are there any critical issues or improvements regarding outdoor recreation in Missouri among Missouri residents?

Research Question 20 (RQ20)

• Are there any crucial issues regarding outdoor recreation in Missouri among Missouri residents?

Research Objective 20.1 (RO20.1)

• Determine perceived issues regarding outdoor recreation among Missouri residents.

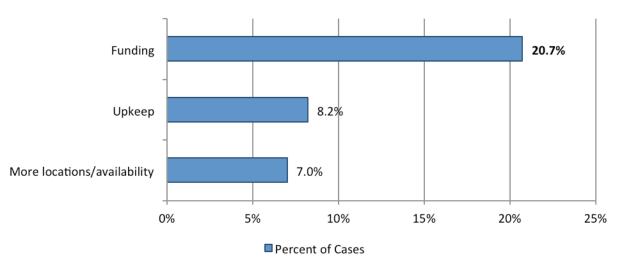

Respondents were asked what they perceive as the biggest issue(s) regarding outdoor recreation in Missouri. Open ended responses were coded and tallied for all responses mentioned in at least 1% of cases (Table RO20.1a, Chart RO20.1a and Appendix \$q24_c).

Table RO20.1a Frequencies (coded open end* – urban and rural combined) \$q24_c What do you perceive as the biggest issue(s) regarding outdoor creation in Missouri?						
		Res	sponses	Percent of		
	N _w Percent					
	Funding	159	19.20%	20.70%

Chart RO20.1a. Perceptions of Missourians Regarding Issues Affecting Outdoor Recreation

q24_c What do you perceive as the biggest issue(s) regarding outdoor creation in Missouri? (Percent of Cases)

Action Standard 20.1 (AS20.1)

- IF more than 5% of respondents mention a perceived issue THEN take action (q24).
- ✓ Recommend taking action on the following:
 - Funding (20.7%, n_w=159).
 - Upkeep (8.20%, n_w=63).
 - More locations/availability (7.0%, n_w=54).

• Are there any suggestions from Missouri residents on how to improve outdoor recreation in Missouri?

Research Objective 21.1 (RO21.1)

• Determine respondent suggestions for improving outdoor recreation in Missouri among Missouri residents.

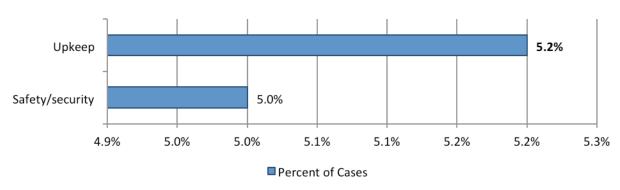

Respondents were asked to please provide any comments and suggestions that they think would improve outdoor recreation in Missouri. Open ended responses were coded and tallied for all responses mentioned in at least 1% of cases (Table RO21.1a, Chart RO21.1a and Appendix B: \$q25_c).

Chart RO21.1a. Suggestions to Improve Outdoor Recreation

\$q25_c Please provide any comments and suggestions that you think would improve outdoor recreation in Missouri? (Percent of Cases)

Action Standard 21.1 (AS21.1)

- IF more than 5% of respondents mention a suggestion THEN take action (q25).
- ✓ Recommend taking action on the following:
 - Upkeep (5.2%, n_w=40).
 - Safety/Security (5.0%, n_w=38).

Recommendations

SYNERGY/PRI/JPA recommends taking action on the following:

Research Question 4: How satisfied are Missouri residents with the availability of outdoor recreation activities?

- ✓ Recommend taking action on the following:
 - Action Standard 4.2 (AS4.2)
 - o Improve satisfaction with organized recreation programs.

Research Question 5: What types of outdoor recreation <u>activities</u> do Missouri residents want to see more of in their local area?

- ✓ Recommend taking action on the following:
 - Action Standard 5.1.1 (AS5.1.1)
 - o Walking trails
 - o Biking trails
 - o Youth related activities

Research Question 6: How available are outdoor recreation facilities in Missouri?

- ✓ Recommend taking action on the following:
 - Action Standard 6.2 (AS6.2)
 - Walkable streets and sidewalks
 - Less available to rural residents compared to urban residents
 - o Dog Parks.
 - o ATV/ORV riding areas
 - Less available to urban residents compared to rural residents
 - Outdoor aquatic complexes
 - Action Standard 6.3 (AS6.3)
 - Among the 55.5% (n_w =406) of Missouri residents that use gardens at least once per year, 21.2% (n_w =86) indicated supply was either way too few or too few.
 - Among the 47.0% (n_w=345) of Missouri residents that use trails at least once per year, 25.3% (n_w=81) indicated supply was either way too few or too few.
 - Among the 39.2% (n_w =286) of Missouri residents that use outdoor swimming pools at least once per year, 26.6% (n_w =77) indicated supply was either way too few or too few.
 - O Among the 32.6% (n_w =243) of Missouri residents that use camping sites at least once per year, 26.6% (n_w =65) indicated supply was either way too few or too few.
 - Among the 23.7% (n_w=167) of Missouri residents that use outdoor aquatic complexes at least once per year, 21.2% (n_w=36) indicated supply was either way too few or too few.
 - O Among the 19.9% (n_w =145) of Missouri residents that use target shooting sites at least once per year, 27.9% (n_w =39) indicated supply was either way too few or too few.
 - \circ Among the 14.0% (n_w =99) of Missouri residents that use ATV/ORV riding areas at least once per year, 36.1% (n_w =36) indicated supply was either way too few or too few.
 - \circ Among the 12.3% (n_w=91) of Missouri residents that use outdoor basketball courts at least once per year, 39.1% (n_w=36) indicated supply was either way too few or too few.

- o Among the 9.7% (n_w =72) of Missouri residents that use tennis courts at least once per year, 28.0% (n_w =20) indicated supply was either way too few or too few.
- o Among the 9.3% (n_w=68) of Missouri residents that use Frisbee/disk golf courses at least once per year, 34.4% (n_w=23) indicated supply was either way too few or too few. Research Question 7: How likely are Missouri residents to use currently unavailable facilities if they were made available?

✓ Recommend taking action on the following:

- Action Standard 7.1 (AS7.1)
 - Walkable streets and sidewalks

Research Question 9: What types of outdoor recreation <u>facilities</u> do Missouri residents want to see more of in their local area?

- ✓ Recommend taking action on the following:
 - Action Standard 9.1 (AS9.1)
 - o Walking trails
 - Water park/pool
 - o Parks

Research Question 10: How often do Missouri residents participate in outdoor recreation activities?

- ✓ Recommend taking action on the following:
 - Action Standard 10.1 (AS10.1)
 - Walking
 - Higher participation among urban residents compared to rural residents.
 - o Family gatherings
 - o Driving for sightseeing
 - o Gardening
 - o Picnicking
 - o Outdoor swimming
 - o Wildlife observation/birding
 - Fishing
 - Higher participation among rural residents compared to urban residents
 - Boating, sailing, canoeing and kayaking
 - Higher participation among rural residents compared to urban residents
 - Playgrounds
 - o Camping in a campground
 - o Bicycling.
 - Higher participation among urban residents compared to rural residents
 - Dog Walking
 - Hiking
 - Wildlife/outdoor photography
 - o Target shooting
 - Higher participation among rural residents compared to urban residents.
 - Baseball
 - Higher participation among urban residents compared to rural residents.

- Hunting
 - Higher participation among rural residents compared to urban residents
- o **Golf**
 - Higher participation among urban residents compared to rural residents
- o Running/jogging
- o Outdoor basketball
- Backpacking
- ATV/off road riding
 - Higher participation among rural residents compared to urban residents

Research Question 11: Are <u>activity</u> levels of various outdoor recreation activities in Missouri increasing, decreasing, or remaining the same among Missouri residents?

- ✓ Recommend taking action on the following:
 - Action Standard 11.2 (AS11.2)
 - o Fishing.
 - o Camping in a campground.
 - o Bicycling.
 - o Baseball.
 - o Golf.
 - o Running/jogging.
 - o Soccer.

Research Question 15: How satisfied are Missouri residents with various aspects of outdoor recreation <u>activities</u> in Missouri?

- ✓ Recommend taking action on the following:
 - Action Standard 15.5 (AS15.5)
 - o Improve satisfaction with community participation in outdoor recreation.
 - Action Standard 15.6 (AS15.6)
 - o Improve satisfaction with outdoor recreation user and group interactions.
 - Action Standard 15.7 (AS15.7)
 - o Improve satisfaction with the quality of organized/supervised recreation programs.

Research Question 17: How satisfied are Missouri residents with aspects of outdoor recreation <u>facilities</u> in Missouri?

- ✓ Recommend taking action on the following:
 - Action Standard 17.4 (AS17.4)
 - o Improve satisfaction with variety of facilities.
 - Action Standard 17.9 (AS17.9)
 - o Improve satisfaction with pet/dog accommodations at facilities.

Research Question 18: What is the relative importance of aspects of outdoor recreation in Missouri compared to their performance?

- ✓ Recommend taking action on the following:
 - Action Standard 18.3.1 (AS18.1)
 - Recommend maintaining performance of the following:
 - Both on the local level and in Missouri overall:
 - Quality of activities
 - Availability of activities
 - Quality of facilities
 - Availability of facilities
 - Distance to facilities
 - In Missouri overall:
 - Variety of activities
 - Quality of activities
 - Safety of facilities
 - Action Standard 18.3.2 (AS18.2)
 - Recommend increasing performance on the following:
 - Both on the local level and in Missouri overall:
 - Number of facilities
 - Variety of facilities
 - In local areas:
 - Variety of activities
 - Action Standard 18.3.3 (AS18.3)
 - Recommend deemphasizing the following:
 - Both on the local level and in Missouri overall:
 - Professionalism of outdoor recreation employees
 - Cleanliness of facilities
 - Travel time and congestion to facilities
 - In Missouri overall:
 - Accessibility of activity information
 - In local areas:
 - · Safety of facilities
 - Action Standard 18.3.4 (AS18.4)
 - Recommend taking action as well as deemphasizing the following:
 - Both on the local level and in Missouri overall:
 - Interactions with outdoor recreation activity users and groups
 - Pet/dog accommodations at facilities
 - Community participation in local outdoor recreation activities
 - Availability of organized/supervised outdoor recreation programs
 - Quality of organizes/supervised outdoor recreation programs
 - In local areas:
 - Accessibility of activity information

Research Question 20: Are there any crucial issues regarding outdoor recreation in Missouri among Missouri residents?

- ✓ Recommend taking action on the following:
 - Action Standard 20.1 (AS20.1)
 - o Funding
 - o Upkeep
 - o More locations/availability

Research Question 21: Are there any suggestions from Missouri residents on how to improve outdoor recreation in Missouri?

- ✓ Recommend taking action on the following:
 - Action Standard 21.1 (AS21.1)
 - o Upkeep
 - o Safety/security

Appendix A – Questionnaires

\$50,000 - \$74,000
