AREA DESCRIPTION, LENGTH AND TYPE OF FENCE, AND REASON(S) FOR FENCING

EXAMPLE: 9 – Rolls 47” Woven Wire, 3 – Rolls Barb Wire, 270 – T Post, 48 – Pipe, 2 – 16’ Gates, 2 – Cattle Panels

CONDITIONS AND RESPONSIBILITIES

- The landowner shall be responsible for fence construction and to utilize fence construction methods that do not damage trees; structures; soil; wetlands; habitat for sensitive species; geologic, cultural, historic or other resources that occur within the park or historic site boundary. The fence construction methods shall not employ modification of soil or debris elevations that drain wetlands or cause the impoundment of water on property owned by the Missouri Department of Natural Resources. The fence must be located on the precise boundary line to the extent that the line can be identified or verified. Landowner agrees fence placement is not a boundary determination of individual parcels, nor to be used in place of a property boundary survey by a licensed professional land surveyor.
- The department will provide to the landowner, at its own expense, all fence construction materials and shall monitor the construction activities to ensure compliance. The cost of fence material shall constitute the department’s share of costs to provide an enclosure as provided for in sections 272.020 and 272.060, RSMo.
- The fencing project for which these materials are provided shall be completed by the landowner within 180 days from the delivery date of the fencing materials unless an extension is requested to and granted by the MDNR.
- The landowner and its successors are responsible for maintaining the fence, which shall include removing brush, vines, woody re-growth or re-sprouting of approved cut trees on state park property at no greater a distance than three feet inside the park boundary*. The landowner is not permitted to access park property with brush hogs, tractors, heavy equipment, ORVs, motorcycles, or any other vehicle of any kind without permission from the park or historic site facility manager. The landowner is not permitted to apply any herbicides for purpose of killing or controlling vegetation on the park side of the boundary, or which may drift onto park vegetation without permission of the park/site facility manager. The landowner is permitted to trim back overhanging branches at the point immediately above the park boundary line and to a height of eight feet above the ground.
 * Any fencing coinciding with the boundary between individual landowner property and the portion of the historic Missouri Rock Island Railroad corridor owned, leased, or operated by the Division of State Parks shall be maintained by the Division of State Parks unless the individual landowner agrees to perform the maintenance, in accordance with section 253.175, RSMo.
- No fencing constructed under this section shall be removed without the written consent of the department, except to temporarily make repairs to said fence.
- Landowner agrees to abide to all conditions and responsibilities set forth in 10 CSR 90-2.070.
