MISSOURI TRAILS OF MISSOURI STATE PARKS

Wallace State Park ROCKY FORD TRAIL

On Rocky Ford Trail, a long, gentle slope leads down through the oak trees toward Deer Creek. In the spring, expect to see a multitude of wildflowers including spring beauty and Dutchman's breeches. As the trail reaches the creek, it narrows and may be muddy or flooded following heavy rains. The trail name, Rocky Ford, describes the series of limestone shelves that cross the creek. This ford may have been a crossing on the Mormon Trail more than 150 years ago. Today it is a favorite spot for visitors to take pictures and play in the creek. Large sycamore and cottonwood trees are mixed in among the oaks along with poison ivy and stinging nettle. The trail eventually joins Deer Run Trail and ends at the Lake Allaman spillway.

Distance: 0.6 Mile Uses: Hiking M Blazes: Yellow Class: Linear Surface Type: Natural Trail Rating: Moderate Estimated Hiking Time: 26 Minutes Trailhead & GPS Location: 39.65920, -94.21550 Elevation profile is not available

You may experience:

2) Natural Surface-dirt/mud/gravel, shifting rock, slippery surface, etc.

- 3) Rocks, roots and/or downed vegetation on trail
- 9) Bridges and/or structural crossings
- 11) Occasional water over trail

Slippery conditions and/or downed vegetation

2 Natural surface: dirt, mud, gravel, shifting rocks, slippery surface, etc.

3 Rocks, roots and/or downed vegetation on trail

- 4 Low-hanging vegetation **6** Physically challenging obstacles
- Wood or stone steps

• Steep grades and inclines over 10%

Bluffs or drop-offs next to trail

Bridges and/or structural crossings

• Water/stream crossings without bridges

Occasional water over trail

- Provide the second s
- Emergency response signs
- Narrow passages

Baised or protruding obstacles

- Electric fence crossings
- Bison/elk

 Rapidly changing weather conditions

Motorized boat traffic

Unexpected waves

Changing water levels

Surface or submerged objects

TRAIL BLAZE COLORS & SURFACE TYPES

The maps on this website indicate the blaze colors for each trail. If more than one trail shares tread, that portion of the trail is identified by more than one color. The surface type of a trail is indicated on the maps generated by this website by a pattern overlapping the blaze color of the trail.

TRAIL TYPE – Loop, Multi-loop, One Way, System or Multi-section A loop trail is one that will return you to the trailhead. Multi-loop trails offer two or more separate loops, ex, a trail having a north and south loop. A **one-way** trail takes you from the trailhead to the farthest point on the trail and you will have to retrace your steps to return to the trailhead. If you plan to return to your starting point on a one-way trail, you will have to double the distance to calculate your estimated mileage and/or hiking time.

A trail system is a series of interconnected trails that allow you to chose your own route.

A Multi-section trail offers two or more separate sections, ex. Katy Trail State Park, and distances are shown both for the entire trail and the sections.

YOU MAY EXPERIENCE

These conditions are all things you may encounter while on a Missouri state parks trail. Trailhead signs at the start of each trail also indicate which conditions exist on that trail.

ESTIMATED HIKING TIME

The estimated hiking time was determined by considering the average user's speed and the conditions that might be experienced on a specific trail. Your speed may be slower or faster than the time listed.

GPS COORDINATES

There are several methods of communicating GPS coordinates. Most GPS units will convert from one coordinate system to another. If you require a different coordinate system for your unit, visit dnr.mo.gov/gisutils/ to convert the coordinates shown on this map to another version.

NATURAL AREAS / WILD AREAS

Natural areas are identified in pink. Natural areas are recognized as the best remaining examples known of Missouri's original natural environments. These natural areas are managed and protected for their

scientific, educational and historical values. Missouri state parks have 38 designated natural areas, encompassing almost 22,000 acres.

Wild areas are identified in brown. The Missouri Wild Area System is made up of large tracts of land set aside as wilderness, which make the perfect setting for hiking and

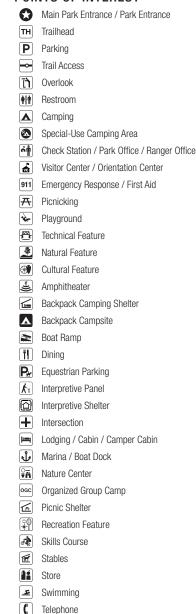

backpacking. A wild area must be 1,000 or more acres in size, show little impact from humans, and possess outstanding opportunities for solitude. They are strictly protected for their wilderness benefits as well as for their use for environmental education and scientific study.
