Locust Creek Covered Bridge State Historic Site Accessibility Information

Parking for this bridge is of packed, mostly level gravel. The one-fourth mile route to the bridge is a historic roadbed and consists of loose 1-inch gravel. Two short slopes of up to 10 percent grade are encountered at the footbridge near the parking lot. Another excessive slope occurs at the approach to the covered bridge. Information kiosks along the way interpret the bridge and include brochures. The area is subject to flooding and may be closed during times of high water.
